C O N T A I N I N G

FIRST, **T**ABLES of EAST-INDIA INTEREST, calculated with the greatest Accuracy, at $\frac{1}{4}$ per Cent. per Month of thirty Days, as used at Bombay, Surat, Tellicherry, Anjengo, the Gulph of Persia, and all the Company's Settlements on the Coasts of Malabar and Coromandel, Bengal, &c. exhibiting at one View the DAILY INTEREST of any Sum, from twenty-five Rees to two hundred thousand Rupees, and from one Day to three hundred and sixty-five Days (or one Year); also a TABLE calculated to find, at one View, any Number of Days from the first of August to the thirty-first of July, for two Years successively; by which is shewn the Number of Days from the Time any Sum of Money is paid or received till the Time of settling the Accounts.

SECOND, TABLES to reduce Rupees into Sterling, at 2s. 5d. 2s. 6d. and 2s. $7\frac{1}{2}$ d. from $\frac{1}{4}$ Rupee to 40,000 Rupees; and, *vice versa*, from 1 Farthing to 40,000l. at 2s. 5d. 2s. 6d. and 2s. $7\frac{1}{2}$ d. the Rupee.

THIRD, TABLES of BOMBAY MAUNDS reduced into SURAT MAUNDS, of different Seers to the Maund, with EXAMPLES to work them.

FOURTH, A VIEW of the COINS, WEIGHTS and MEASURES of Bombay, on the Coasts of Malabar, India, China, and Persia, &c. under their proper Heads.

FIFTH, ACCOUNT of the various COMMERCIAL ARTICLES traded for in Bengal, Persia, Malabar, China, the Dutch Settlements, Mocha, Bombay, Europe, and Surat, &c. What GOODS each Place produces, and how sold; with the DIFFERENCE of WEIGHTS and MEASURES each Commodity is sold by. Together with a Detail of what particular SPECIES of MERCHANDIZE are proper for each Market; the Manner of purchasing, and Instructions for chusing each Article, whereby the good may be known from the bad.

SIXTH, The DUTIES and CUSTOMS paid in each Port for all SHIPS trading, and GOODS landed; with the Presents, Fees, &c. made at Judda, Mocha, &c. with Prices current, and Accounts of SALES of real Cargoes at each Port; with many other useful Tables, &c.

Illustrated with the MARKS on CHINA GOLD and the TUBS of TEA, very exactly taken.

The Whole carefully compiled, revised and corrected, from a Course of many Years USE, in a real and very extensive TRADE.

By R O B E R T S T E V E N S ,
M E R C H A N T i n B O M B A Y .

L O N D O N :

Printed for the Author, and sold by S. BLADON, Bookseller, in *Paternoster Row*; D. STEEL, Bookseller, on *Tower-Hill*; and by Mr. GREGORY, Mathematical Instrument Maker, near the East-India-House, *Leadenhall Street*.

M D C C L X V I .

P R E F A C E.

IT might almost naturally be expected, I should say something by way of Preface, or Apology, for publishing Papers on Matters which so little has been said of, and which, when originally written, were far from being intended for the Press.—The very few Publications that have been made on East India Trade by any of my Predecessors, can give the Europeans who never took so long a Voyage but a very faint Idea of it, and laid me under a Necessity of drawing the greatest Part of my Work, from real Transactions, done by myself, or others with whom I was well acquainted.—However, I shall not, like many Preface Writers, endeavour to raise the Reader's Expectation of my Book, beyond what it deserves, being sensible, it must stand or fall by its own Merit alone.—But yet, it may perhaps be thought necessary I should say something regarding its Utility, by way of explaining some Matters which may not be generally understood.

During my Residence in several Parts of India, I had many Opportunities of transacting particular Parts of Trade, which nothing but a Life spent in that Branch of Commerce can bring a Man thoroughly acquainted with; and it was the little Knowledge generally obtained of these Things, which first prompted me with a Desire of revising these Papers.

The TABLES of EAST INDIA INTEREST were drawn up at first for the Use of a very capital House in Bombay, where they were constantly referred to for many Years, and great Care was taken at every Opportunity to make them as correct as possible.—On my leaving that Island, I was requested by many Persons to leave Copies; but Time not permitting it, besides the Difficulty of Copeying such a Number of Figures, I promised they should have them from England, which they will now have an Opportunity of doing at a very easy Rate.—

In Order that the referring to these Tables may become easy to the Tyro as well as to the Man of Business, it will be necessary to observe, that the first Column in each Page is the Principal, or Number of Rupees,—the other Columns denote the Interest arising from such Principal for the Number of Days, specified at the the Top of each.—But, to render it still clearer, I shall give an Example.

A Gentleman in India, being possessed of 1000l. Sterling Capital, which is valued in the honourable Company's Cash, 8000 Rupees, at 2s. 6d. per Rupee; not choosing to run any Risque in Trade, places it in a private Merchant's Hands, at the common Interest of $\frac{1}{2}$ per Cent. per Month of 30 Days, is desirous of knowing how much both Principal and Interest will amount to in three Years?

Rupees	Rupees	Rup. Dec.
8000 Principal Sum.	8730 Due the 31st July, 1766.	9526,6125
365 Days in one Year,	365	365
4) 2920,00,0	43650	476330625
	52380	571596750
730 First Year's Interest.	26190	285798375
4) 3186,45,0		4) 3477,21,35625
	796 2 45 Second Year's Interest.	869 1 21 3d Year's Int.

The first principal Sum paid July 31, 1765 being 1000l. or Rupees 8000
Interest thereon to the 31st of July, 1766, being one Year 730

Due July 31, 1766, Principal and Interest 8730
Due Interest, 365 Days — — — 796 2 45

1767, Second Year, due 9526 2 45
Interest 365 Days 869 1 21

1768 Third Year, due 10395 3 66

Worked

Worked by the TABLES,

Principal 8000 Rupees		in	365 Days	Rupees 8000 gives 730	
				First Year 8730	
Rupees	Days		Rup. Qrs. Rs.		
8730 { 8000	365	—	730		
700	365	—	63 3 50

				796 2 45	
				Second Year 9526 2 45	
9526 { 9000	365	—	821 1 0		
2 45 { 500	365	—	45 2 50		
26	365	—	2 1 49		
45	365	—	0 0 22		
				869 1 21	
				Third Year 10395 3 66	

N. B. When you want to find the Value of any Decimals for the Quarters and Raes, as in the third Year being 2 Quarters 45 Raes,
See in the Table against 2 Quarters for 365 Days is

And against 50 Raes	045625
	011406
The Sum is	057031
Multiply by	4

And cut off two Figures to the Left, is 22,8124

The great Use of these Tables appears very clear, when we consider that almost every Dealing in Trade in India bears Interest, and many Men have raised immense Fortunes by this Way of Traffick only.

The TABLES of MAUNDS it is almost needless to say any thing about.—Any Person who has ever been in India, will easily recollect, on his first coming there, how great a Stranger he was to the Weights of that Country, and how valuable a Work of this Kind would have been to him.

The PRICE CURRENTS are all fixed at a Medium.—It is natural to suppose the Price of any Commodity is not always the same, but fluctuates according to the Esteem it is in; but from these the Adventurer may partly estimate the Value of the Article he intends to carry out, and the Merchant of that he is about to sell.

The INVOICES of Goods bought or sold, may be objected to by some, as being rather too numerous,—but this I am far from considering as any Defect.—The Merchant, who has perhaps transacted these Parts of Trade himself, may think some of them superfluous, but the Youth who is desirous of diving into this very extensive Trade, will agree with me, that they considerably enhance the Value of the Work, besides the many DUTIES, CUSTOMS, CHARGES, &c. paid thereon, under them, still more necessary, as the Knowledge of these are of the utmost Consequence to every Person trading there, to prevent his being imposed on, by a Set of People very desirous of doing it.—

It may be unnecessary to acquaint the candid Reader he is not to expect the same Congruity in a Work of this Kind, he does in a System of Arithmetick:—The Difference of Time and Place attending the drawing up the Matter occasions the Non-conformity, and the great Speed used with the Press, on Account of my leaving England, made the digesting them not so clear as I could wish;—however, unconnected as they may appear, the Merchant, I flatter myself, will find Solutions for many Difficulties occurring in East India Commerce.

Before I close this Preface, I must confess how much I am obliged to Mr. AUBORNE of Newcastle, for the Perusal of a very valuable Manuscript, written by his late Father, a Commander in the East India Service, entitled, “*Memorandum on the Trade and Produce of several Parts of India.*” This would undoubtedly have been a great Acquisition, had not this Work been so far printed before the Manuscript came to Hand,—but some Extracts I have been able to make, under the Heads of ACHEEN, MALACCA and MADRASS, and should my Book ever come to a second Edition, I have made such a Provision, as shall render it more worthy the Notice of the Public.

London, April 3,
1766.

ROBERT STEVENS.

for Monies lent or received, although entirely unacquainted with the
Manner of calculating it.

Carefully examined and corrected by a Twelve Years Use of these Tables in a real and
very extensive Trade, with Persons of the most eminent Traders there, with
EXAMPLES shewing their Use in every Shape, &c.

N. B. Every Sum of Money paid or received in an open Account Current, bears Interest
till such Account is settled, which in India, is always on the 31st of JULY, when
the Interest so adjusted to that Day (be it for, or against the Person, that borrowed or
lent it) becomes Principal, and bears Interest to the next 31st of JULY, or till paid.

RULES and EXAMPLES

For Working and Reducing Goods that are sold in INDIA by Maunds of different Seers, but weighed by Avoirdupoise Weight.

TOOTHNAGUE is sold at Bombay by the Surat Maund of 40 Seer.

N. B. 30 Surat Seer, is 1 Bombay Maund of 28 Pounds Avoirdupoise.
30 Surat Pice, is 1 Seer.

EXAMPLE I.

SUPPOSE I sell 325 Slabs of Toothnague that weighs 140 cwt. 1 qr. 22 lb. which is Bombay Maunds of 28 lb. 561 B. mds. 22 lb. And is Surat Maund of 40 Seer, 421 surat mds. 13 seer, 20 pice, which I sell at 5 rupees 3 qrs. 50 raees per Surat Maund,

The Value is 2475 Rupees, 1 Quarter, 53 Raees.

Work thus :

	B. mds.	decimals of 22 lb.	
Take	561,	789289	
Multiply by		30 Seers, which is 1 Bombay Maund	
	4,0)	1685,3,678670	Cut off the Decimals, and divide by 40, and the Decimals .678670 multiply by 30 Pice.
Surat Maunds		421,13,20	30
			Gives Pice 20,360100 Cut off the Decimals.

Answer, gives 421 Sprat Maunds, 13 Seers, and 20 Pice:

	Surat mds.	seer.	pice.		rupees.	qrts.	raes.
Then say	421	13	20,	which I sell at	5,	3,	50 per Surat Maund.
	seer	decimals		mds.	dec.		quart. raees.
	13,	67867,0	divide by 4,0	421	,34196	0 0	875 decimals of 3 50
4,0			fr. pi.		5,875		
		,34196	dec. of 13 20		210670980		
					294939372		
					337073568		
					210670980		
	Rupees	2475,38401500		Cut off the Decimals of remaining Rupees.			
				4 Multiply the Decimals by 4.			
	Quarter	1,53,606000					

Answer, 2475 Rupees, 1 Quarter, 53 Raees:

N. B. The remaining 606000 decimals, are about the half of a Rae.

EXAMPLE II.

SUGAR CANDY is sold by Surat Maund of 43 Seers and a Quarter.

SUPPOSE I sell 36 Canisters of Sugar Candy, that weighs Net 43 cwt. 2 qrs. 14 lb. which are Bombay Maunds of 28 lb. 174 Bombay Maunds, 14 lb. and are Surat Maunds of 43 Seer and $\frac{1}{4}$, 121 Surat Maunds, 1 Seer, 18 pice, which I sell at 7 Rupees per Maund,

The Value is 847 Rupees, 1 Quarter, 13 Raees.

Work

Work thus:

B.mds. dec.
Take 174, 5 of 14 lb. and
Multiply by 30 Seers, (one Bombay Maund)

43,25) 5235,00 and divide by 43 seers, 25 decimals.
.9100(5 121 Surat mds.
.45(7
.1

Take 175 dec. the Remainder, and add 00, sufficient for four Places in decimals, and divide as before by 43,25) 17500 (.0404 dec. multiply by 40 Seers (a Surat Maund)
.20000 40
.2700

1,6160 Cut off the Decimals, and the Seers are 1,
Multiply by 30 pice, (one Seer)

Pice 18,4800 Cut off the Decimals, as not being the Value of half a Pice.
Surat mds. seer, pice.

Answer gives 121 1 18 which is to be sold at 7 Rupees 48 Maund.

S.mds. dec.
Then say, 121, 0404 as above of 1 Seer and 18 Pice at 7 Rupees
7

Rupees 847, 2828 Cut off the Decimals, leaves Rupees.
4 multiply, for 4 Quarters is 1 Rupee

1,13,12 Cut off the Decimals, leaves Quarters and Raes.

Answer, 847 Rupees, 1 Quarter, 13 Raes.

EXAMPLE III.

IRON is sold by the Surat Candy of 20 Maunds per Candy.

SUPPOSE I sell 107 Bars of Iron, weighing 22 cwt. 2 qrs. 17 lb. which are Bombay Maunds of 28 lb. 90 Bbay mds. 2 qrs. 3 lb. and are Surat Candy of 20 mds. 3 candy, 7 mds. 38 seers, 8 pice, which I sell at 114 rupees per Surat candy.

The Value is 387 Rupees, 2 Quarters, 76 Raes.

Work thus

B.mds. Decim. Qrs. lb.
Take 90, 60714 of 2 3 and
Multiply by 30 Seers, (one Bombay Maund)

271,8,21420 Cut off the decimals, and divide by 40 Seers, (one Surat Maund)

4,0) Is 6,7,38 Surat Maunds, 38 Seers; and divide by 20 Maunds, (one Surat Candy)

2,0) Surat Candy 3, 7, 38

Then take the Decimals 21420 so cut off, and
Multiply by 40 Pice, (one Seer) 40

Gives Pice 8,56800 Cut off the Decimals,

The Remainder is better than half a Pice.

Answer, 3 Surat Candy, 7 Maunds, 38 Seers, 8 Pice, which I sell at 114 Rupees 48 Candy.

Then by the Rule of Three say, S. Cand. Mds. Seer. Pice.

If 20 Maunds sell for 114 Rupees, what will 3 7 38 8
40 Seer 1 Candy is Mds. 20

Seers 800

67
1 Maund is Seer 40

Dec.
Seers 2718, 2140 of 8 Pice.
Multiply by 114 Price sold at

108728560
27182140
27182140

Divide by 8,00) 3098,76,39,60 Cut off the Decimals,

Gives Rupees 387, 2, 76

Answer, 387 Rupees, 2 Quarters, 76 Raes.

N. B. Anchors, Grapnells, Sh--t and G--ns are sold by the Hundred Weight, and need no Examples.

E X-

EXAMPLE IV.

ALLUM is sold by the Surat Candy of 21 Maunds.

SUPPOSE I sell 474 cwt. 2 qrs. 23 lb. of Allum, which are Bombay Maunds of 28 lb. 1898 B. mds. 3 qrs. 2 lb. $\frac{1}{2}$, and are Surat Candy of 21 Maunds, 67 candy, 16 mds. 12 $\frac{1}{2}$ seer, which I sell for 45 Rupees $\frac{1}{4}$ Candy.

The Value is 3051 Rupees, 2 Quarters, 82 Raes.

Work thus:

B. mds. decim.	qrs.	lb.	
Take 1898, 83928	of 3	2 $\frac{1}{2}$	and multiply by 30 Seer (one Bombay Maund.)
30			
4,0) 56965,17840	Cut off the Decimals and divide by 40 Seers, (one Surat Maund)		
21) 1424,12946	St cand. dec.	lb. d.	qrs. lb.
.167.3148(8	(67, 81568	23	5 equal to 3 $\frac{1}{2}$
.1. 1.1.1(1	20 mds. (1 candy)	.1	10 83928 decimals.
Maunds 16,31360			260
40 Seer, (one Maund)			.80
Seer 12,54400			240
30 Pice, (one Seer)			.26

Pice (or half a Seer) 16,32000 These Decimals are of no Value.

Answer, 67 Surat Candy, 16 Maunds, 12 Seer, 16 Pice.

Candy decim. mds. seer, pice, rupees.
Then say, 67, 81568 equal to 16 12 16 at 45 $\frac{1}{4}$ Candy.

33907840	
27126272	
Rupees 3051, 70560	Cut off the Decimals and multiply
By 4	
Quarters 2, 82, 240	

Answer, 3051 Rupees, 2 Quarters, 82 Raes.

EXAMPLE V.

CAMPFIRE is sold by the Surat Maund of 42 Seers.

SUPPOSE I sell 29 cwt. 1 qr. 25 lb. 4 oz. which are Bombay Maunds of 28 lb. 117 B. mds. 25 lb. 4 oz. and are Surat Maunds of 42 Seers, 84 Surat mds. 8 seer, 18 $\frac{1}{2}$ pice, which are sold for 46 Rupees $\frac{1}{4}$ Surat Maund.

The Value is 3873 Rupees, 3 Quarters, 65 Raes.

Work thus:

First find the Decimals of 25 lb. 4 oz.

B. mds. dec.	lb. oz.	lb. decim.
Take 117, 9017	of 25 4	28) 25, 2500 (9017 the Decimals.
By 30 Seer, (one Bombay Maund)	and multiply	.. .220
42) 3537,0510	Cut off the Decimals and divide by 42 Seers, (one Surat Maund)	24
.179	Sur. mds. dec.	
...6310	(84, 2155	
.2	40 Seer, (one Maund)	
.2	Seer 8,6200	
	30 Pice, (one Seer)	

Pice 18,6000 These Decimals are above $\frac{1}{2}$, so say $\frac{1}{2}$.

Answer, 84 Surat Maunds, 8 Seer, 18 $\frac{1}{2}$ Pice.

Then

S. mds. dec. feer, pice.
Then say 84, 2155 equal to 8 18 1/4 fold at 46 per Maund.

5052930
3368620

Rupees 3873,9130 Cut off the Decimals and multiply
By 4 to make Quarters and Raes.

Quarters 3, 65, 20

Answer, 3873 Rupees, 3 Quarters, 65 Raes.

EXAMPLE VI.

PISTACHE FLOWERS are fold at 44 Seers per Surat Maund.

SUPPOSE I have to sell 4 cwt. 2 qrs. 5 lb. 1/2 which are Bombay Maunds of 28 lb. 18 B. mds. 5 qr. 5 lb. 1/2, and are Surat Maunds of 44 Seers, 12 S. mds. 16 feer, 8 pice, and sell at 7 Rupees 3/4 Maund.

The Value is 86 Rupees, 3 Quarters, 38 Raes.

Work thus:

First find the Decimals of 5 lb. 1/2 viz.

Take B. md. decim. lb. 18, 19642 of 5 1/2
Multiply by 30 Surar Seer (one B. Maund)

44) 545,89260 Cut off the Decimals and divide by 44 Seer (one Surat Maund)
1072282 S. mds. dec.

1... 12, 40660
40 Surar Seer (one Maund)

Seer 16,2640

30 Pice (one Seer)

Pice 7,9200 very near 8 Pice.

Answer, 12 Surat Maunds, 16 Seer, 8 Pice, or 7 23/4.

S. mds. dec. feer, pice.
Then say 12, 40660 equal to 16, 8 fold at 7 Rupees per Maund.

Rupees 86,84620 Cut off the Decimals, and multiply
By 4 to make Quarters and Raes.

Quarters 3, 38, 480

Answer, 86 Rupees, 3 Quarters, 38 Raes.

HING in Jars is fold as above.

N. B. I work all my Division by Contractions, but those who do not understand that Way, may work by the long Division, which answers the same Purpose, but requires a greater Number of Figures.

GOODS proper for the MOCHA MARKET,

AND

Prices bought for at SURAT.

Cassidays	28 Rupees per Corge.
Moravadi	18 ditto
Byrams	25 ditto
Dinglees	9 1/2 ditto
Duthys per Corge	60 ditto
Tobacco	3 1/2 per Surat Maund.
Soap	3 ditto
Cotton Yarn	from 15 to 18 Rupees per Maund.
Cotton	78 1/2 ditto per Candy.

N. B. This Cotton was provided before the Troubles at Surat ; for when I was there, you could not buy under 90 to 130 Rupees per Candy.

BOMBAY

BOMBAY COINS, WEIGHTS and MEASURES.

COINS.

- 5 Raes, are 1 Pice.
 5 Pice, 1 Ana.
 16 Anas, or 80 Pice, 1 Rupee.
 100 Raes, 1 quarter Rupee.
 4 Quarters, or 400 Raes, 1 Rupee.

N. B. Accounts are kept in Rupees, Quarters, and Raes.

Great WEIGHTS.

- 30 Pice, 1 Seer Bombay.
 40 Seers, or 28 lb. Avoirdupoise, 1 Maund.
 20 Maunds, or 560 lb. Avoirdupoise, 1 Candy.

Small, or Silver Weights.

- 2 $\frac{1}{2}$ Goonze, are 1 Voll.
 40 Volls, 1 Tolla.
 1 Tolla, 1 Rupee.

MEASURES.

- 2 Tiprees, 1 Seer.
 4 Seers, 1 Adowlee.
 16 Adowlees, 1 Parah.
 8 Parahs, 1 Candy.

N. B. This serves for Wheat, and all Grain but Batty, which goes by Tiprees, Seers, Adowlees and Parahs, only of Batty.

- 6 and $\frac{1}{2}$ Parah, is 1 Candy.
 25 Ditto, or 4 Candy, is 1 Morah.

SALT has a particular Measure, as follows, viz.

- 100 Baskets, 1 Anna.
 1600 Baskets, or 16 Annas, 1 Rath.

MOCHA WEIGHTS.

	lb. oz. dts. gr. dec.
1 Carat is, Troy Weight	0 0 0 3 057
16 Carats, or 1 Caffala, is	0 0 2 0 912
1 $\frac{1}{2}$ Caffala, or 24 Carats, is 1 Mifcall	0 0 3 1 368
10 Caffalas is 1 Vachia	0 1 0 9 12
1 $\frac{1}{2}$ Vachia, is 1 Beak	0 1 10 13 68
87 Vachia, is 100 Spanish Dollars	7 4 13 0 0

MOCHA Custom-House Weights, are only Stones sewed up in Gunnies, viz.

	lb. oz.
1 Maund, or 40 Vachia, weighs, Avoirdupoise	3 0
10 Maunds, or 1 Frazill	30 0
15 Frazill, or 1 Bahar	45 0
1 Rattle, or 15 Vachia	1 2

BEETLEFAKEE Custom-House Weights.

	lb. oz. dts. gr. dec.
1 Maund weighs, Troy	2 0 10 23 4
10 Maunds, or 1 Frazill	20 5 9 14 4
40 Frazill, or 1 Bahar	81 4 0 0 0 0

They reckon 14 $\frac{1}{2}$ Vachia at Beetlefakee, to 1 Rattle, and 2 Rattles to 1 Maund in Coffee; 290 Vachia, is 1 Frazill; and to all other Goods 75 Vachia to a Rattle: But of all Sorts of Merchandize whatever (excepting Jaggary, Dates, Candles and Iron, of which 16 Vachia make 1 Rattle) 10 Maunds is 1 Frazill, and 40 Frazill makes 1 Bahar. The Rattle is only used in the Buzar or Market, as well at Mocha, as at Beetlefakee.

At Mocha there is a small Maund, which is but 30 Vachia, and weighs but 2 lb. $\frac{1}{2}$ Avoirdupoise, by which Vermillion is always sold.

The COINS of this Country are only Carrets and Comesties, sometimes 7, and sometimes 4 Carrets to one Comesti, which rise and fall extravagantly, according to the Quantity of Silver there is in them, sometimes from 25 to 160 to a Spanish Dollar.

The WEIGHTS are seldom exact, and the smaller they are the greater the Difference, though they rectify them yearly by the Weights of the Imaum's Shroff, whose Business it is to examine them, under which Cover he has an Opportunity of adding something to the Money Weights, for which he is well paid by the Moors, who are the greatest Exporters of Silver, and that has occasioned the increase of the Weight of 100 Spanish Dollars for several Years, viz.

In 1713 the Weight of 100 Spanish Dollars was				oz.	dwts.	grs.
1717	_____	_____	_____	88	2	0
1720	_____	_____	_____	88	4	0
1721	_____	_____	_____	88	6	0
1722	_____	_____	_____	88	10	0
1725	_____	_____	_____	88	10	12
1726	_____	_____	_____	88	11	11
From 1727 to 1740	_____	_____	_____	88	13	6
1740	_____	_____	_____	88	13	0
1752	_____	_____	_____	88	19	9
				88	19	15

100 German Crowns is 93 Ounces, 0791666 Decimals:

Cotton is sold per Harraffs, which is imaginary, and

9 Harraffs is 11 $\frac{1}{2}$ Mocha Dollars.

1 Harraff is 1 Mocha Dollar, 22 Cavears.

1 Mocha Bahar is 16 $\frac{1}{2}$ Bombay Maunds, or 12 Surat mds. 15 feer, 12375 dec.

Country Dollars and Cavears are both imaginary.

80 Cavears is 1 Country Dollar.

121 $\frac{1}{2}$ Country Dollars is 100 Spanish Dollars.

80 Cavears are reckoned in Account to 1 Spanish Dollar, but that is also imaginary, as well as the Cavears at Beetlefackee; 40 whereof make 1 Spanish Dollar.

At MOCHA most Goods are sold for Country Dollars, except China Ware, China Silks, also Olibanum and some few other Goods, and even those are sometimes sold for Country Dollars.

Pillar Dollars are most esteemed, and next to them Mexico, (for which all Bargains are made payable) German Crowns pass in Tale for common Things, and up the Country for a weighty Spanish Dollar.

Their hundred Dollars Weight is 4 Dollars 44 Cavears more than 100 Mexico Dollars, full Weight, at which the Shroffs take them, one among another. French Crowns are 2 per Cent. worse than Mexico, and Estimates or small Pice will daily pass at Beetlefackee.

GOLD COINS of Sorts are worth more or less, according to the Demand there is for them, there is about 2 per Cent. in the following Species, when taken in Weight, more than when taken in Tale, but they are always sold by the Weight.

		Mex. Doll.	Cav.		Mex. Doll.	Cav.
Venetians	—	2	15	to	2	20
Gubbers	—	2	10	to	2	15
Albatraffes	—	1	48	to	1	50
Ibraims	—	1	48	to	1	50
Stamboles	—	2	3	to	2	5

M E A S U R E S.

The Hand Cobit or Covit is	_____	_____	18 Inches.
The Long Iron Covit	_____	_____	27 ditto.
The Short Iron Covit	_____	_____	25 ditto.

For GRAIN there are only Kellas and Tomands, 40 Kellas one Tomand, and weighs 165 pounds in Rice.

For LIQUIDS,

16 Vachia make one Nusselah

8 Nusselahs make one Cuda, and is about 2 Gallons.

PRICE CURRENT at MOCHA
OF
SUNDRY GOODS from EUROPE and the MALABAR COAST,
Taken at a Medium.

Europe	Steel, at 81 Spanish Dollars the Bahar.
	Iron Bars, at 35 Mocha Dollars the Bahar.
	Lead, Sheet, Shot or Bars, at 6 Spanish Dollars per Hundred Weight.
	Vermillion, at two Mocha Dollars the Maund.
Coasts of Malabar	Cotton Yarn, at 10 to 15 Mocha Dollars the Frazil.
	Tobacco of Surat, at 6 to 4 Mocha Dollars the Frazil.
	Pepper, black, at 79 $\frac{1}{2}$ Mocha Dollars the Bahar.
	Cotton, at 9 Harrafs, for 11 $\frac{1}{2}$ Mocha Dollars.
	Beetlenut, white, at 45 to 30 Mocha Dollars the Bahar.
	Mangalore Rice, at 2 $\frac{1}{2}$ Mocha Dollars per Robin.
	Bombay Rice, at 4 $\frac{1}{2}$ Mocha Dollars, the Tomand, and out of every Tomand of Rice, you give, as is customary, half a Measure to the Governor; and for every 12 Tomands to the Coolies of Baub Shadley half a Measure; also for every 12 Tomands you must give the Coolies of the Factory half a Measure. Besides this exorbitant Demand, the Governor takes from the Merchant that buys the Rice, five Measures out of every Tomand for himself, and one for the Coolies of Shadley, and one for the Pearhead Coolies.

Note, 4 Small Measures is 1 Large Measure.

10 Large Measures make one Tomand, or 40 Small Measures.

1 Tomand weighs 171 lb. Avoirdupoise.

Sundry GOODS bought at MOCHA, for the Europe Market.

Myrrh, the Frazil at 8 Mocha Dollars.
 Saloop, the Pound at 1 Spanish Dollar.
 Olibanum, the Bahar at $12\frac{1}{2}$ Spanish Dollars.
 Aloes Socratrina, the Bahar 30 Spanish Dollars.
 Coffee, sundry Prices, the Bahar at 80 to 95 Spanish Dollars.
 Rattans, the 1000 of 1100 at 6 Mocha Dollars.

N. B. You must pay the Customs of 3 per Cent. Brokerage, Cooley Hire, Boat Hire, &c. Charges for all Goods bought in the Country, the same as Landing.

A REAL CARGO.

JUDDA WEIGHTS and TARES.

1 Vokia is equal to Troy Weights	_____	_____	_____	lb. oz. dwts.
15 Vokia is 1 Rattle	_____	_____	_____	0 1 0
2 Rattles, 1 Maund	_____	_____	_____	1 3 0
10 Maund, 1 Frazil	_____	_____	_____	2 6 0
10 Frazil, or 100 Maund, is 1 Bahar, and should be nearest	_____	_____	_____	222 6 0 Troy.

But as all Goods are weighed by the Stilliards, after the Turkish Manner, the Europeans, as well as the Turkish Merchants, are obliged to rest contented with such Weights as the Weigher thinks proper to give them.

No Merchants are allowed to weigh Goods, when bought or sold, at their Houses: Besides this, they have an unreasonable Custom of certain Allowances on all weighable Goods, the particular Rebates, besides the Tare are as follows:

Sugar, after the Tare is deducted, Rebate	_____	_____	_____	20 $\frac{1}{2}$ Cent.
Stick and Lump Lack, ditto	_____	_____	_____	20 $\frac{1}{2}$ Cent.
Long Pepper, ditto	_____	_____	_____	20 $\frac{1}{2}$ Cent.
Turnerick, Pepper, Ginger, Cardemums, Beetlenut, Sandall Wood, Callambeck, Agala	_____	_____	_____	
Wood, Nutmegs, Cloves, Thread, Cinnamon, Patch Leaves	_____	_____	_____	10 $\frac{1}{2}$ Cent.
Lead and Tin, or any Kind of Metal	_____	_____	_____	5 $\frac{1}{2}$ Cent.
Camphire 105 $\frac{1}{2}$ 100	_____	_____	_____	

N. B. Piece Goods pay 8 per Cent. Customs in Specie, and all other Goods are valued by the Custom-house Officers; and whatever Value they put upon them, though ever so unreasonable, they never will abate.

As all Piece Goods pay in Specie, it is proper to pack even Hundreds' in every Bale: Or thus, 100 Pieces 125, 150, 175, 200, 250, &c. for whatever odd Pieces they find in a Bale, they value them at an unreasonable Rate, and make you pay these Customs, which they term Callamee, and Seiraphee in Money, neither is this to be remedied but by the Bahaw, to whom you can have no Admittance for that Purpose.

The Variety of Silver and Gold Coins at the Port of JUDDA, Spanish Dollars, Mexico Dollars, and Pillar Dollars, and what they pass for, viz.

	dol.	oz.	dwt.	
Judda Weight	100	87	4	at 250 Crufe
German Crowns	100	91	6	at 255 ditto
Razeens, Barbary Coin	100	87	4	at 240 ditto
Lump Silver, if good	100	87	4	at 250 ditto
Pistecens of Philip V.	100	87	4	at 225 ditto
Lyon Dollars	100	87	4	at 195 to 200
Popes Coins 100 Crowns per Tale				125 Crufe
Muskovy ditto				150 ditto
Bar Silver	100	87	4	at 250 ditto
Zelottas, per Tale				100 for 105 Crufe, to 100
Venitians, 100 weighs 29 Secar Rupees, 13 Annas	4			Judda Crufe, and $\frac{1}{2}$ Pice.
Stamboles, 100 ditto	4	$\frac{1}{2}$		Ditto
Zermabobs, per Tale	3	$\frac{1}{2}$		Ditto
Genjuls, per Tale	3			Ditto
Turas, or Turaly, per Tale	3			Ditto
Gubbars, the Weight of 100 Hamarrs, which is $2\frac{1}{2}$ per Cent. short of the Weight of 100 Venitians, or Stamboles, at $4\frac{1}{2}$ Crufe per Cent.				
Zomams, or Ring Gold, are sold by the Vokia, which is nearest to 2 Rupees, 11 Annis, 6 Pice, Seca Weight, at 40 Crufe per Vokia.				

N. B. Sometimes you are obliged to take Zelotas at the Rate of 235 per Tale, for 250 Crufe. — 1000 of the Zelotas weigh often no more than 48lb. to 50lb. Troy, instead of 52lb. they ought to turn out, for many of them are clipped. Mr. H—, in 1754, had 3 per Cent. on Gold and Silver from Judda to Bombay, and $3\frac{1}{2}$ for what was delivered at Surat.

Almonds to be delivered at Bombay at 6 Crufe per Bag.
Elephants Teeth and Cloth may be worth about 5 per Cent.
White Arsnake at $3\frac{1}{2}$ Crufe per Bahar.

Charges of Merchandize and Pilotage paid at JUDDA, viz.

Pilotage in and out	100

	281	Pieces Value at Judda Cruse.	3000

The above Presents are to be made out of such Goods as are in your Cargoe, both of fine, middling and coarse.

The Bashaw and Sheriffs Presents being 42 Pieces each, as by the foregoing List; and that to consist of two Pieces of every Sortment of the finest and middling Goods, and should a few Pieces be wanting, you are to make up the Deficiency out of the ordinary Sortments. The Bashaw Kia, and the Sheriff's Vifier, are to have 21 Pieces each, as by the List; and that one Piece of each Sortment as the Bashaw and Sheriff has, the rest of the Officers Presents are to be made out of the middling and ordinary Sortments; and Care must be had that the Quantity of Pieces given to each Person may be so sorted that the Valuation, as by the List, may not be exceeded.

PRESENTS to be made in Money to the Bashaw's petty Officers after visiting him.

PERSIAN MONEY.

THE Persian and Armenian Merchants commonly keep their Accounts in Denairs, which is but nominal, or an imaginary Coin among them. So much as five Denairs is called a Ghawfe or Ghawfeberg, and is equal to one Doode Madrafs, and consequently 40 Denairs are equal to one Fuman or 3 Pence; five Denairs one Cozbeq.

Denairs		Country Names
50 is	One Shahee	Panjah Deniar.
100 —	One Mahamode	Sadnah.
200 —	One Abafee	Decivees Deniar.
250 —	One 5 Shaee Piece	Decivees Panjah Deniar.
1000 —	Five Abafees	Hazor Deniar.
4000 —	Twenty Abafees	Chechar Hazor Deniar.
40000 —	Fifty Abafees, or one Tomand,	Dch, Hazor Deniar.

DIREC.

DIRECTIONS for putting up proper ASSORTMENTS of SURAT GOODS for the BUSSORAH MARKET.

	Bales.	Corge.
S HELLAS or Salloes Red	2	20
Sahn Red	2	20
Bafta Red	1	15
Humfy Red	1	16
Humfy Siah Surmaie	2	30
Duty Siah Surmaie Pono De Guzzee	5	25
Bafta Siah Guzzee Surmaie	2	20
Duty Mauwee or light blue Der Guzzee	3	15
Bafta Siah Surmaie	2	10
Shellas or Salloes Siah Surmaie, the Cloth to be thick or close woven of the 1st and 2d Sort, half of each to cost at Surat from 33 to 40 Rupees per Corge	4	60
Sahn Siah Surmaie, the Cloth to be close	3	30
Dutty Brodree	10	50
Dutty Broachee	8	40
Byram Noufauree Surmaie, the Cloth to be thick or close woven, and due Regard to be had, that the Coondce be well made or performed, as the Chilibys generally is, and in which our Brokers are remifs	12	192
Byram Broachee Surmaie, the Cloth to be thick or close wove, and the Coondce to be well performed, as mentioned in the foregoing Article	6	96
Byram Randaree Surmaie, &c. as above	6	96
Cotton Yarn Siah Surmaie, each Bale to weigh 5 Surat Maunds	3	15
Mulmuls Siah, or Bengal Mulmuls, called Settregezee, died at Surat a very deep blue	1	10

And observe that the above mentioned red and blue Goods, are the Bulk of the Consumption of Bussorah and Places adjacent, so that to a very considerable Amount is like to go off well; but from Thirty-five to Forty Thousand (35 a 40000) Rupees worth, will be enough at once, and likely to meet with good Sales. Observe likewise that the sooner these Goods are provided at Surat, the cheaper they will turn out, and by being early at Market, you will have the Advantage of chusing or procuring the Goods of a better Quality, than when the Monsoons are far advanced, or the latter End of it.

TOUFAREEK or FINE GOODS of SURAT, viz.

	Corge.
Soofey Humdee Seefeed and Cheendar	10
Germefoot Guzzee Elvan Mutariff	10
Germefoot Guzzee Kimefi Solbifi	3
Germefoot Muhlerhaune, their Colours to be $\frac{1}{3}$ Kermefi Goolhaur and Narungi, and $\frac{2}{3}$ of all the other usual Colours	5
Germefoot Mahamed Shai Sefeed	2
Chitaura Mahamed Shai Sefeed	1
Chitaura Elvan Caukneedar	1
Chitaura, yellow and white striped	1
Chitaura, red and white striped	1
Chitara Penge Reng Kalam Areed, being of five different Colours in one Piece, and the Stripes broad	1
Choutaura Amshaut	2
Bafta Bootidar, if good, Part of them with large Flowers, and Part with small Flowers; the Cloth to be good, and to cost from 8 $\frac{1}{2}$ to 9 Rupees	10

Of the Taufareek, or fine Goods of Surat, if well provided, from Eight to Ten Thousand Rupees worth may go off well.

And Taufareek, or fine Goods of Guzzarat, if well bought or provided, from Four to Five Thousand Rupees worth may also do well.

Cotton, 150 to 200 Bales.

China Ware, Bowls and Dishes, large Dishes for Pillaw, Coffee Cups, Jars, large and small Sneakers and Plates, &c. if of the proper Assortments, will do.

Coffee. This Year about 6500 large Bales are come from Muscat, it sold at first at 50, and then fell to 46 $\frac{1}{2}$ Mamoodies, and now is risen again to 50, and almost all sold, and a Prospect of its keeping-up in Price.

Lump Lack, Bengally, from 80 to 90, and in Demand.

Allum, 15 to 16.

Pepper fell to 52, and within these three Days is risen again to 55, and likely to keep up.

Iron is at 42, if a large Quantity comes may fall.

Lead, 26 to 27.

Ginger, white, at 30 Mamudies per Maund Attary.

Ditto, brown, at 20 to 23 ditto:

Turmeric, 28.

Cardamums, much in Town and no Demand.

Cassia from 40 to 80 according to its Quality.

A PRICE

A PRICE CURRENT of BENGAL GOODS proper for the Bufforah Market, with the Assortments most proper, or generally used in putting-up the said Goods.

MULMULS Annendee, of the first Sort, } *N. B.* Three Quarters to be of this first Sort, and one
 Ditto, second Sort, } Quarter of the Quantity of the second Sort.

Mulmuls Setra Guzzee, of the first Sort, which at Bufforah go under the Names of Mulmuls Sherbery and Mahamed Hyatee; and please to observe, let two third-parts be of the Mulmuls Annendee, in the Manner above specified, and the other third part be of Setra Guzzee, as above mentioned, when they may, one with the other, sell for about 52 Mamoodies per Piece.

And be pleased also to observe, that the Assortments of Goods made up for Bufforah, are generally, or ought to be, in the following Manner, that is to say, two third Parts ($\frac{2}{3}$) or thereabout, of your whole Parcel of Goods ought to be of Mulmuls and Mulmuls Setra Guzzee, in the Manner and Proportion as is above specified, and the remaining third Part of the Adventure ought to be made up of the Goods here undermentioned: All which Goods together, or one with the other, generally go at a certain Rate, more or less, according to the Demand and Quantity at Market at present. The Purchasers have offered, for Goods brought by the Hibernia, a Present from 53 to 55 Mamoodies per Piece, one with another, but the Sellers have hitherto held their Hands in Expectation of getting more.

But, please to take Notice that all your Goods be the proper and usual Lengths and Breadths, in which if they are deficient, it will prejudice the Sale.

Mulmuls Santipore of divers Sorts, when sold seperately, may be from 45 to 70 and 80 Mamoodies per Piece, according to their Quality, but observe the finest Sorts are in most Demand.

Mulmuls Savagapore, as they call them here, the old or true Sort. Of each Sort an equal Quantity now worth 55 Mamoodies per Piece.

Mulmul Savagapore Solofof.

Mulmuls Chura Sonergam, at 35 Mamoodies per Piece.

Sarookpeach, at 30 to 35, per ditto.

Cowookpeach, at 18 per ditto.

Cassa Solofof, — at 55 per ditto.

Cassa Ketmerry, — at 55 per ditto. But observe, one Bale of this is enough to every 25 or 30 Bales of Mulmuls.

Terrandams, fit for Bufforah, are generally of the same Value of the foregoing Cassas, and sorted in the like Manner of one Bale to every 25 or 30 Bales of Mulmuls.

Cassa Boorum, from 35 to 45 Mamoodies per Piece, one or two Bales to every 25 or 30 Bales.

Cassa Izmary from 40 to 50 Mamoodies per Piece, and sorted in like Manner as the foregoing.

Dooria Rizapat and Dooria Alley Cauny, from 50 to 65 Mamoodies per Piece, sorted as the foregoing.

Munga Dooria of the Tanzib Sort, at 135 per Piece, one or two Bales.

Munga Dooria of the Mulmul Kind is not here in Demand.

Munga Dooria of the Bafta Kind, 55 Mam. per Piece. 5 or 6 Bales.

Bafta Decca, from 45 to 60 Mam. per Piece, 2 or 3 Bales.

Please to observe, that the above specified Goods are of the proper Sorts or Kind, to sell to the Merchants who come, to purchase them, from the different Parts of Turkey, viz. Constantinople, Smyrna, Aleppo, Tokat Diabeker, Bagdad, &c. And the Goods which are proper for the Consumption of Bufforah itself, are

Seerserkers Olmara, from 20 to 30 Crush per Piece, each Crush $4\frac{1}{2}$ Mamoodies.

Soofy Roon Shaukee. But observe, that the most of them be of Crimson and Purple Stripes, and some few only of yellow; but take Care not to have any other Colours from 40 to 70 Mamoodies per Piece, from Six to Eight Bales.

Ramauls Choppa, 36 to 37 Mam. per Piece. Let their be an Ornament or Flower in the Middle, and one at each Corner, then they are most esteemed. About 200 Pieces is enough.

Taffa Chaley, from 40 to 70 Mamoodies per Piece, 500 to 600 Pieces.

Cheeklay Shauls Baft, 40 to 80 Mamoodies per Piece. 400 Pieces.

Sahan Jugdea, from 18 to 33 Mamoodies. About 15 to 20 Bales.

G R U F F, viz.

Lump Lack, worth 80 Mamoodies per Maund Attary, from 6 to 800 Maunds Attary may go off at that Rate.

Tin, 60 Mamoodies per Maund Attary.

Lead, 23 to 25. If small Supplies come, it may rise to 30, but if large Quantities, will hardly fetch 20 Mamoodies per Maund.

Tirmerick, of that Sort which is here called Chawley, 22 to 23 Mamoodies per Maund.

Ginger, being scarce, is worth 30 Mam. per Maund, but should large Supplies come, it may fall to 18 or 20. Observe, the whiter the Ginger the better.

Rice sells according to the Plenty or Scarcity of the Season. It was at 60 Mamoodies the Bufforah Maund, which for Rice generally turns out about one hundred Pounds English, but as Supplies are come in, and the new Harvest approaches, it is fallen to 38 to 39 Mamoodies per Bufforah Maund.

Since writing the above, there hath been sold all the Bengall Piece Goods proper for the Inland Market, brought by the Hibernia, at 57 $\frac{1}{2}$ Mamoodies per Piece, one with the other, as specified in the above Sortiment.

* * The Reader may see from the above, the Method used in purchasing Goods at the Surat and Bombay Markets, — with the Prices commonly given, and the Quantities generally put up for Bufforah — with the Rises and Falls in Price, attending these Commodities.

			Some

Some General REMARKS on the TRADE to BUSSORAH.

ON a Ship's Arrival at this Port, it is customary first to wait upon the Shavander, there you will continue till the Bashaw is pleased to order you Admittance.—It is necessary here you should settle the Customs with him on a solid Foundation, as he often exacts more than he first agrees for. In the Year 1774, he agreed to take 5 per Cent. on Piece Goods; and 6 per Cent. on Gross Goods, but afterwards demanded 7, and 8 $\frac{1}{2}$ per Cent. which we were obliged to comply with. This done, you land your Goods, and deposit them in your Warehouse, on which the Shavander puts his Chop till they are properly examined.

The Merchants here are very troublesome in their Dealings, upon the least Shadow of Difference (which they are perpetually endeavouring to find out) you may be under a necessity of making them very unreasonable Allowances. The usual Price for a linguist, is two Tomaunds, with a present of about two more for extra Trouble, and 1 per Cent. to the Broker on what he sells for you.

The Custom-House Duties, rate all Callicoes (whether fine or coarse) not exceeding one Ell in Breadth, ten Yards to a Piece, and pays Custom 3s. 6d. $\frac{1}{2}$, and 15 per Cent. on each, as sold by the Candle. All Goods prohibited, pay only a $\frac{1}{2}$ Subsidy, with 2 $\frac{1}{2}$ per Cent. All Goods not mentioned in their Book of Rates (China Ware excepted) sold to the Amount of 100l. Sterling, pay 17l. 17s. 8 $\frac{1}{2}$; and China Ware, for each 100l. pay 18l. 8s. 9d. $\frac{1}{2}$. Callicoes that exceed 1 $\frac{1}{2}$ Yard in Breadth, 6 Yards are computed to make a Piece.

The Bussorah Maunds for Cotton is	2	Surat Maunds.
Indigo	3	Surat Maunds, 35 Seer.
Gross Goods	28 $\frac{1}{2}$ lb.	
Sapan Wood	30 $\frac{1}{2}$ lb.	
Ginger	26 $\frac{1}{2}$ Maunds.	
Turmeric	19	Ditto.

Iron Guns, 36 Maunds to the Quintal of 112 lb.

10 Bayderock, make 1 Demim.

5 $\frac{1}{2}$ Demims, — 1 Mamoodie.

4 Mamoodies — 1 Zelotie.

P R I C E C U R R E N T

OF

SUNDRIES on the Coast of MALLABAR, at a Medium.

WHITE Beetlenut at Mangalore, costs 33 $\frac{1}{2}$ Rupees per Candy of 560 lb.

Red ditto, at ditto, costs 37 $\frac{1}{2}$ Rupees per ditto. With an Allowance of 2 per Cent. to the Broker there.

Red Beetlenut at Tellicherry and Callicut, from 44 to 47 Rupees per Candy of 600 lb.

Tutenague, 22 Rupees per Pecul.

Sapan Wood at Callicut, 36 Rupees per Candy.

Coir of Laccadavia, 27 Rupees per Candy of 600 lb. and 1 per Cent. Brokerage.

Dammer, at Callicut, 30 Rupees per Candy of 600 lb.

Light Pepper at ditto, 104 Rupees ditto, ditto.

Coa at ditto.

Cloves at Cochin, 375 Rupees per Chest.

If your white Beetlenut is new and good, it will have a white Skin like a Cap, on the broad End, and will look like a Nutmeg, but if old, if you break or cut it, you will find it quite rotten at the Heart, and the Skin, if old, by frequent moving, breaks off.

At Mangalore, whoever you send must keep a very good look out, or when they are weighing and filling the Robins, the Boys will surround you and steal it after it is weighed. It will be a trifling Expence to have it put up in Robins; it will not make so good Stowage, but you will save considerably by it.

Copper at Bombay sold for 17 $\frac{1}{2}$ Rupees per Surat Maund.

Tin in Bars, for 12 Rupees per hundred Weight.

Red Lead, for 14 Rupees per ditto.

White Lead, (being scarce) 16 Rupees per ditto.

Quicksilver, for 85 Rupees to 90 per Sur. Maund.

Cutlary, at 60 per Cent. on the Invoice.

Saffron in Tin Canisters with Oil, 6 Rupees per Pound.

Duroys, dark Colours, 12 Rupees per Piece.

Beer in Casks (all the Coast) 40 Rupees per Hoghead.

Coarse Felt Hats, about 70 per Cent.

Gold Thread, in Bobbins, if not at Bombay, will do at Goa among the Portuguese, or at Bengall,

Glass Lanthorns and Shades, at Cent. per Cent.

Tar, 20 Rupees per Barrel.

N. B.

N. B. Let your Cutlery be Sword Blades, of the Cimeter Kind, broad and long Persian Blades, and will yield from 50 to 60 and 64 Rupees per Corge.

Large Clasp Knives,
Knives with Mohocks,
Cases of Knives and Forks,
Taylors Sheers,
Scissors of Sizes.

Cloves, sold at Bombay for 150 Rupees per Surat Maund, of 42 Seer.

Nutmegs, ditto 100
Mace ditto 105

Cardemums, first Sort, 44 Rupees, and the second Sort for 35 Rupees per Maund Surat.

Conj. at 80 Rupees per Surat Candy of 22 Maunds.

PRICES of sundry Goods bought on the Coast of MALLABAR, for the CHINA Market, with Instructions for Purchasing.

PUTCHOCK, cost from 18 to 22 Rupees per Surat Maund, sells at China, from 35 to 70 Tale Pecul.

Olibanum, garbled, 4 Rupees per Surat Maund	10 Tale ditto
Sandall Wood, 1st Sort, 21 Pagodas per Candy.	
Cotton	10 Tale the Pecul.
Opium, 2 1/2 Rupees per lb.	2 Tale per Catty.
Tin, 43 1/2 Spanish Dollars the Bahar, or 419 lb.	14 Tale the Pecul.
Sherks Fins, to be bought at Tellicherry	17 ditto

If you can depend on a Correspondent at Surat, getting your Quantity of Putchock, have nothing to do with the Governour. Good new Putchock, Charges and all included, ought not to come to above 20 or 21 Rupees the Maund. Give Directions, or particularly desire the Person who is concerned for you, to take care it is neither damaged, full of Dirt and Sticks, nor old. The Dutch garble theirs, but the English make an Allowance at China, of 15 to 25 per Cent. Whenever you sell make the Merchant sign the Agreement immediately, for they very often return Goods.

OLIBANUM. Give strict Orders to the Person that fees it garbled, not to stir till it is finished, and that he takes none but what is of a fine yellow, and not bigger than the End of your Finger, and no Stones amongst it, which they often put in, of a Kind greatly like the Drug, and see that it is sent home directly, or they will open and change it. It is best in Chests of about 3 Cwt.

SANDAL WOOD. Be careful to take none of a red Complexion, nor any that hath large Knots, or Cracks that go quite through, small Cracks you need not mind, so it is free from Knots and of a fine yellow. If you are for China, be sure to apply on your first Arrival on the Coast, to the Chief of Tellicherry, and when you go down, at Magalore and Annore. It is to be had at Mangalore for about 21 1/2 Pagodas per Candy of 600 lb. Exchange, 383 Rupees per 100 Pagodas.

OPIMUM. Enquire of the Chief of the black Merchants, but without you can get a Person of great Judgment to try it, and can depend on his Knowledge, have nothing to do with it. You must be careful of mentioning it at Malacca, but on your Arrival at China apply to a Person who lives where the Country Ship generally hath a Factory, if you can depend on the Integrity of the Man, he will buy it of you, and give a good Price; but make it your Agreement for him to get it up, the Risque being as bad as at Malacca.

TIN is to be bought at new Queda, in the Streights of Malacca (you cannot go in there within a League of the Shore for a Bar) for 43 1/2 Spanish Dollars, the Bahar equal to 419 lb. English, or 115 Rupees, but as the Advantage is considerable, agree for Dollars, if you have them. Here your Opium will sell with Safety for better then Cent. per Cent. the English and Portuguese Country Ships generally basket it for Tin. The country Ships generally meet ours, and will sell their Tin for Rupees instead of Dollars, but observe to get large Slabs if possible; if you cannot get all large, you may take every thing but tin Chain Slugs, like Jack Chains and thin Stuff of Birds, &c.

If you are obliged to take small Stuff, the Officers must take care where it is stowed, or the Sailors will steal it to sell for Samshow; and keep a good look out when taken in.

If you buy of a Country Ship, know whether they sell by the Queda or Salengare Bahar: The first is equal to 419 lb. the other not so much, and is bought for 36 and 37 Dollars the Bahar, and 80 Rupees.

PRICE

PRICE CURRENT of GOODS sold at BOMBAY, and bought on the Coast of MALLABAR, viz.

At CALLICUT,

	Rupees	
Copra	40	per Candy of 21 Bombay Maunds

Carvines			686 Fifth,
Pomphlets			720 ditto.
Arrack			750 Gallons.
Sugar	5 cwt.		560 lb.

G g

WEIGHTS

WEIGHTS on the COAST.

AT MANGALORE, the Maund weighs 27 lb. $\frac{1}{2}$, and 21 Maund is one Candy, in all Goods equal to 574 lb.

At OLLAR and MALLABAR FRONTIER, the same.

Note, 42 Bales or Robins, 1 Corgie of Rice.

At MUNJAYSEER the Maund is 24 Rattle, equal to 25 $\frac{1}{2}$ lb. In weighing red and white Beetlenut, the Cuffom is 21 Maund 8 Rattles, equal to 544 lb. all other Goods are 22 Maunds to the Candy, or is 561 lb. Both here and at Mangalore, Jerusaul Rice was bought for 21 Pagodas per Corgie of 42 Robins, and the Exchange was 408 Ruppes per 100 Pagodas. Also at Mangalore the Current Coin is Pagodas, Chuckrees and Tars, which the Shroffs rise or fall in Value as it suits their Interest.

18 Tars is 1 Chuckree, and in making up Accounts 16 Chuckrees is 1 Pagoda, but to exchange Pagodas at the Shroffs 15 Chuckrees and 4 Tars, sometimes they will give you nine Tars.

In weighing off Venitians the Cuffom is, 100 Venitians to 3 Chuckrees Weight; and 9 Chuckrees Weight is equal to 12 Voll at Bombay, or 1 Venitian fall Weight.

The Cuffom of Brokerage is 2 per Cent, and in making Bargains for Goods, they must be always shipped off at the Sellers Charge.

At MULKEY the Maund weighs 29 lb. $\frac{1}{2}$ and 20 Maund to the Candy equal to 580 lb.

COINAGE TABLE for BOMBAY-RUPEES.

The Price paid the Honourable Company, by the Mint Undertakers at Bombay, for 100 Ounces English Troy Weight, of the following Species, clear of all charges; allowing the Rupee to weigh 7 dwts. 11 gr. English Troy Weight, and to be 14 $\frac{1}{2}$ dwts. better than English Standard, viz.

SPECIES of COIN.	Rup.	Qrs.	Raes.
Duccatoons ————— per 100 oz.	249	2	36
English Crowns ————— ditto	245	1	37

N. B. To know what 100 Ounces English Troy Weight will yield the Company's Servants, or their Commanders, deduct 1 $\frac{1}{2}$ per Cent. which is the Coinage Duty; and for all others 2 $\frac{1}{2}$ per Cent.

OBSERVATIONS on TRADE, &c. of ACHEEN, in the Streights of MALLACCA.

ACHEEN is situated on the North West End of Sumatra. The Town is about three Miles up a small River, and consists of a good Number of Houses built upon Stakes, among Trees, on account of the Fushes coming down from the adjacent Hills with great Violence during the rainy Seasons.

It is a Place of pretty considerable Trade; Ships from most of the eastern Parts coming hither: Formerly it was a free Port to the English, they paying no Customs, only taking a Chop for the Freedom of the Port, and some very inconsiderable Presents to the Shabander. But of late they have also demanded Customs for all Goods sold except Rice, which no Nation pays for. However, the English generally refuse to pay any denominated Custom, but make a present to the VALL of an equal Value.

The King exacts a Custom of 2 1/2 per Cent. The King's Chop amounts to about fifteen Tale, viz. Two Pieces of fine Coffees, prime Cost, in Bengall near ten Rupees, and Value here at four Tale and twelve Tale in Money. The Shabander usually keeps Coffees by him, in order to supply such Ships as may have none, at an exorbitant Rate. It is also customary to make a small Present to the Custom-House Officers, or Swals Men.

The Ships from Bengall arrive here in December and January; and those from Surat and the Mallabar Coast, in May and June.

The Danes from Trinecombar, deal much here, bringing chiefly Slaves, and taking the Returns in Gold.

Ships from the Pegu, and Arracean Coasts, bring Siam Tin, Elephant's Teeth, &c. From the Maldives, is imported Salt fish; and from Batavia, China Ware, Tea and Sugar.

The Trade is in general but troublesome, no great Dealers being resident here, so that the Goods are sold by Retail, in a Kind of Shops under the Houses. In this Way all dealings are for ready Money, but if any considerable Quantity is sold together, the Purchaser must have Credit till he has disposed of it, which is sometimes three or four Months; and it seldom happens a Ship sets Sail without leaving several Sums behind unrecieved. Here are some few English, some Moor Merchants, and several Chinese.

The Product of this Place is chiefly Gold; but there are also Pepper, Ginger, Bees Wax, Benjamin, and several Kinds of Gums, Drugs and Block Tin are likewise to be had; and many other Commodities, but not of its own Produce.

Their Money is in Mace and Cash; the Mace is a gold Coin, about the size of a Twopenny Piece, but thinner, weighing about nine Grains; the Cash is a small Piece of Lead, 2500 of which, usually pass for a Mace, but that often varies 7 or 800 in a Mace.

Accounts are commonly kept in Tale and Mace; and on selling any Goods, you are paid in Gold Dust and Cetrava, by a Weight called a Buncall, which often varies in its Price, or Quantity of Tales. Silver is very scarce here, though it is only used to make Alloy for the Mace.

ACHEEN MONEY, WEIGHTS and MEASURES.

- 4 Copang Acheen, is 1 Mace (an imaginary Coin.)
- 1 Mace Acheen, is reckoned 5 Fanams Madrafs.
- 8 Mace Acheen, make 1 Pagoda Madrafs.
- 16 Mace Acheen, make 1 Tale Acheen.
- 80 Mace of 5 Tale, make 1 Buncall.

The true Standard of a Buncall, is 80 Mace, or 5 Tale; although in Trade, Merchants make their Buncall heavier or lighter as they please.

Twenty Buncalls, make one Catty.

N. B. As the Buncall is bigger or lesser, so must the Catty be:

One Catty of Acheen, makes 265 Pagodas, to 270 1/2.

One Tale of Acheen, is less than 11, Sterling more than 2 1/2 Pagodas.

The Acheeners usually sell 4 Tale 11 Mace of Acheen Gold for 5 Tale 11 Mace in Mace. In this Weight they always make of new Mace, 200 Catty of Acheen, in one Bohar Molay or 3 Pecul China.

The Acheeners do so adulterate the Coin, that one Tale Acheen, is less than 2 Pagodas.

2 Quarters of Rice, weighing 31b. 19 oz. is one Bamboe.

21 Bamboes, is a Maund of 75 lb.

4 Caul, is a Bamboe, with the King's Chop on it (of about a Pint each) but

5 Caul, is commonly a Bamboe.

The long Measures are Coabets, the same as in Bengal, of half a Yard each.

PRICE CURRENT at MALLACCA, viz.

Rattans, 20 Rix Dollars per 100 Bundles, Exchange 210 Rupees, per 100 Pillar Dollars.
 Cloves, 2, ditto, per 2 Stivers per lb. 220 Rupees per ditto.—The Rupee Value at
 5 Schillings.
 Birds Nests, the 2d Sort, from 330, to 350 Rix Dollars the Pecul.
 Cloves will not do, some Captains have lost considerably by them.

If you are inclined to buy Birds Nests, for your Friends in Europe, let them be fine and white, and be sure to open the Bundles before you weigh them, or you will have between every piece more dirt and dung than Nest.

Be sure you cut the Rattans, and do not trust to lifting them up with your Fingers.

N. B. The Company's Iron generally turns out more in China than the Invoice; their Steel, Teeth, and other Goods, less. Therefore, having only regard to give square for square, and flat for flat Bars, send some small of your own, and keep some large of theirs, and you will then find the Gain on your own will pay all the Deficiencies, which will be an Advantage.

Before you leave the Coast, you will easily learn whether the Country Ship is sailed for China or no; if not, you may venture to stop in the Straights for Tin, but if she has got considerably the Start of you, and you should fall in with her in your Passage, stop no where, though you are invited to do so, on a Scheme of mutual Advantage; but if your Ship sails better, make the best of your Way for the first Market; two Days makes an inconceivable Alteration; therefore as soon as you anchor, endeavour to strike before any other Ship arrives.

COINS, WEIGHTS, and MEASURES.

THEY have no particular Coins of their own, some few Dutch Schillings and Stivers are to be seen, the rest are Gold, as Coopangs, Ducats, &c. but all contracts for Goods bought or sold, are made in Dutch Dollars.

1 Japan Coopang stamp'd, is 10 Dutch Dollars, or 8 Spanish.
 A Dutch Dollar, is 8 Tangoes, or Schillings.
 A Tangoe, is 6 Stivers, or 3 double Keys, or 3 Cash.
 A Spanish Dollar, is 10 Tangoes; and in Exchange between Spanish and Dutch Dollars, is an Advance of from 25, to 40 per Cent.
 A Ganton, is 6 lb. Amsterdam.
 A Laast, is 500 Gantons, 10 Gantons, 1 Measure, and 50 Measures, a Laast of 300 lb.
 800 Gantons, a Quoyane, or 1 $\frac{1}{2}$ Laast.
 40 China Pecul, one Quoyane.
 1 China Pecul, Malacca, is 125 lb. Amsterdam.
 1 Bahaar, is 3 Pecul; the Pecul contains 100 Catty, or 375 lb. or 125 Bid.
 1 Catty, is $\frac{1}{4}$ lb.

LIST of a CARGOE proper for the Coast of MALLABAR, to purchase at BATAVIA.

	Rix. Dol.
B ATAVIA Arrack, 200 Leaguers cost nearest in Proportion to 300 per Hardwick	10,400
Sugar Candy 300 Canisters, or about 1000 Pecul, at 7 $\frac{1}{2}$ per Pecul	7,500
Java Sugar about 2000 Canisters, or 6000 Pecul, at 4 $\frac{1}{4}$ per Pecul the Hardwicks Price	27,750
Sapan Wood for Dunnage, 300 Pecul, at 3 per Pecul	900
Cubebs, if procurable, 50 Pecul, at about 30 Rix Dollars per Pecul, as bought for the Hardwick	1,500
Raw Silk, as far as 30 Pecul, say at about 280 per Pecul	8,400
Wax, any Quantity procurable, and which will serve by Way of Ballast, say only 200 Pecul, but this is an article very profitable, the usual price about 25	5,000
Iron or Lead for Ballast, of which Iron has been bought at 6 Rix Dollars per Pecul, and Lead at 7 per Pecul, at which Rates they will answer at Bombay, say of one or both 500 Pecul, or about	3,500
Japan Copper 100 Chests, or 100 Pecul, at 42	4,200
	Rix Dollars 67,350
	Or Rupees at 1, 6 Dec. each 107,760

N. B. As the Profits of the Voyage will chiefly depend on Sugar, if the Burthen of the Ship will admit of it, the Quantity should be increased; and in such Case the additional Quantity might be paid for out of Money allotted for the Wax and Japan Copper, which last is not altogether so profitable an Article, only as it lays in a small Compass, and it is much to be feared that Wax in any great Quantity cannot be got, but if it can, it is a very profitable Article, if the Lead and Iron are not procurable, then the Quantity of Japan Copper, after allotting sufficient for Payment of the Sugar, may be increased, as it cannot easily be overdone. The Raw Silk is a valuable Commodity, and must be bought with Care, and the Hanks or Parcels examined at the Head or Knot of each, for in a Parcel from Batavia, within each Bundle was put Threads of several Sorts to such an amount, that on the Whole we lost by the Imposition above 1000 Rupees.

It is to be observed, that Toothanague, Benjamin, and Tin, are Articles that must not, on any account, be meddled with, being in no manner of Demand this Way.

If there is Surplus Money, some Rattans may be bought to stow in Places that do not take Room, and where other Goods cannot be put; and that tho' 300 Pecul of Sapan Wood is put down if more is requisite for dunnaging the Ship properly; sufficient for that Purpose should at all Events be bought.

COINS, WEIGHTS, and MEASURES.

- 1 Rix Dollar, is 60 light Stivers, or 64 paid on account of Salary, &c.
- 1 Ditto — 48 current Stivers.
- 1 Ditto — 480 Copper Pegue Petty's.
- 1 Jappan Gold Coopang stamp'd, is current for 30 Rix Dollars.
- 1 Ditto — unstamp'd, is ditto for 8 Ditto.
- 1 Gold Duchat, is 2 Rix Dollars, 12 Stivers, or 18 Schillins.
- 1 Spanish Dollar — 10 Ditto.
- 1 Ducatoon — 13 Ditto.
- 1 Rix Dollar — 8 Ditto.
- 1 Surat Rupee — 5 Ditto.
- 1 Bengall Rupee — 4 Ditto.

Ballaffore Gingham	per Corge or per Piece
Mullmalls	per Piece
Champasarrys	per Corge
Pitamber, 14 Covits	per ditto
Ditto 10 ditto	per ditto

BENGAL MONEY.

THE real and imaginary Monies that are used, or pass current in the Kingdom of Bengal, are chiefly as follow, viz.

GOLD COIN.

Gold Mohurs, commonly called Gold Rupees, weigh 7dwts. 8 $\frac{1}{2}$ gr. English Troy-weight, and ought to be 24 Carrafts fine; but by the abuse of the Shroffs (or Minters) seldom exceed 23 $\frac{1}{2}$: They pass from 14 $\frac{1}{2}$ to 15 $\frac{1}{2}$ Silver Rupees, as they are more or less in Demand. There are likewise Halves and Quarters.

SILVER COIN.

Secca Rupees, i. e. new Rupees, were coined once a Year at Hughly, Muxadavad, and Dacca; and, when first issued out, passed at about 18 per Cent. better than the Current Rupees; at which Time all the others, i. e. the old ones, generally fell about 4 per Cent. but this Reduction, as well as the Management of the Coinage, was entirely at the discretion of Jagatsfeed, the great Banker at Muxadavad, who had the sole Privilege of the same, from the great Mogul, and directed it as he pleased. In Calcutta, when the new Seccas were coined, the Governour and Council fixed the current Price on the old Seccas, which were generally between 14 $\frac{1}{2}$ and 16 $\frac{1}{2}$ per Cent. better than the current Rupees; but, in the Space of six or seven Months there was hardly an old one to be seen, which were by that Time

Time all new coined. But since the Revolution which happened in the Year 1756, this Method of Coinage, and the Manner of settling the Value of the *Secca Rupees* at Calcutta, we apprehend have undergone some Alteration.

Madras and *Bombay Rupees*, coined at those Places whose Names they bear, ought to weigh 7 dwts. 11 gr. English Troy weight, and should be $14\frac{1}{2}$ dwts better than English Standard; they pass at 10 per Cent. better than *Current Rupees*.

Arcot Rupees, coined at *Arcot*, near *Fort St. George* and at *Madras*, are somewhat inferior to the *Madras* or *Bombay Rupees*, and generally pass at 2 per Cent. less; which is 8 per Cent. better than *Current Rupees*.

Annoes, small Pieces of Silver Coin, 16 of which make 1 Rupee, ought to be of the same Fineness, and to weigh the one sixteenth Part of the Rupee which they are designed to represent the fractional Parts of: But these, or their Doubles, are rarely met with in Payments.

N. B. There are likewise *Half Rupees* and *Quarter Rupees*.

S H E L L S.

Small Sea Shells, called *Cowries*, are made Use of for small Payments in the *Baazars*, and to pay *Cooleys*, *Labourers*, &c. and are generally reckoned in the following Manner, viz.

4 Cowries	} make	1 Gunda
20 Gunda		1 Ponn
32 Ponn		1 Current Rupee

But these sometimes rise and fall, according to the Demand there is for them, or Quantity of *Cowries* in the Place.

I M A G I N A R Y M O N I E S.

Accounts at *Bengal* are kept in an imaginary Coin, called *Current Rupees*, *Annoes* and *Pice*, viz.

12 Current Pice	} make	1 Current Annoe
16 Current Annoes		1 Current Rupee

To this Currency must all the real Species be turned or reduced, before any Sum, or Sums, can be regularly entered into a Merchant's Book, or Books of Accounts, which may be done by the following Rules, viz.

To turn or reduce *ARCOT RUPEES*, &c. to CURRENCY: Multiply the Sum given by 108 (when they are 8 per Cent. better than Currency) and divide that Product by 100, the Quotient will be the Current Sum required.

To turn or reduce CURRENCY to *ARCOT SPECIE*: Multiply the Sum given by 100, and divide that Product by 108, the Quotient will be the Sum in *Arcot Specie* required.

To turn or reduce *MADRASS*, or *BOMBAY RUPEES*, &c. to CURRENCY: Multiply the Sum given by 110 (when they are 10 per Cent. better than Currency) and divide that Product by 100, the Quotient will be the Current Sum required.

To turn or reduce CURRENCY to *MADRASS*, or *BOMBAY SPECIE*: Multiply the Sum given by 100, and divide that Product by 110, the Quotient will be the Sum in *Madras*, or *Bombay Specie* required.

In like Manner may be turned, or reduced, *Secca Rupees* to Currency, or Currency to *Secca*, having Regard to how much they are better than Currency; which difference between Specie and Currency, is called *Batty* or *Batta*.

But as the Operations by these Rules are somewhat troublesome in the Hurry of Business, especially when the Sums are large, and run to *Annoes* and *Pice*. To obviate this Inconveniency, the following *Batty* or *Batta* Tables, are calculated from One Pie to One Million of Rupees: By the Help of which Tables, the Currency answering to any Number of *Arcot*, *Madras*, or *Bombay Rupees*, *Annoes* and *Pice*, may be easily obtained by Addition only, and so vice versa.

The USE of the BATTY or BATTATA TABLES.

E X A M P L E.

Let it be required to turn, or reduce 2549 Rupees, 14 Annoes, 11 Pice, *Arcot Specie*, to Currency, by the TABLES, viz.

	Cur. Rup.	An.	Pice
2000 Arc. Rupees are Curr. Rupees	2160	0	0
500 Ditto — are ditto	540	0	0
49 Ditto — are ditto	52	14	8,64
14 Arc. Annoes are Curr. Annoes	0	15	1,44
11 Arc. Pice are Curr. Pice	0	0	11,88
Answer in Currency	2753	14	9,96

N. B. The Imaginary Rupee, called a *Current Rupee*, is valued at 2s. 4d. English Sterling, by the Honourable East India Company's Exchange.

BATTY

BATTY or BATTATA TABLES,

Cur. rupee Arc. an. pice.

1 is equal to 14 9 $\frac{1}{2}$

Or, 1 is equal to 14 9,777777777 ad infin.

Cur. Rupees Arc. rup. an. pice.

100 are equal to 92 9 5 $\frac{1}{2}$

Or, 100 are equal to 92 9 5,777777777 ad infin.

N. B. In the preceding Tables, for Turning or Reducing Current Pice, Annos and Rupees to Arcot Specie, are inserted in the Columns of Arcot Pice, only the two first Decimal Parts of an Arcot Pice, they being sufficiently near for any common Calculation.

BATTY

BATTY or BATTATA TABLES,

For turning or reducing Madras Pice, Annos and Rupees to Currency, calculated from One Pie to One Million of Rupees, allowing One Hundred Madras Rupees, equal to One Hundred and Ten Current Rupees, commonly called Batty or Batta 10 per Cent.

Cur. rupee Madr. an. pice.

Cur. rupees Madr. rup. an. pice

1 is equal to 14 $6\frac{5}{11}$ 100 are equal to 90 $14\frac{6}{11}$ Or, 1 is equal to 14 $6,5454545454$ ad Infinit.100 are equal to 90 $14\frac{6}{11}$ $6,5454545454$ ad Inf.

N. B. In the preceding Tables, for Turning or Reducing Current Pice, Annos, and Rupees, to Madras Specie, are inserted, in the Columns of Madras Pice, only the two first Decimal Parts of a Madras Pie, they being sufficiently near for any common Calculation.

CHINA

CHINA WEIGHTS.

AT China they divide Things decimally, as in buying Gold or Silver, which is esteemed by the one hundredth Part, and their Touching Needles (by which they generally try the Fineness of the Gold and Silver) are marked and numbered accordingly. The finest Gold among them is one hundred Touch, called Sycee, that is, pure Gold without any Alloy in it. So if a Shoe of Gold touch 93, then it hath $\frac{93}{100}$ Parts fine Gold, and $\frac{7}{100}$ Parts of Alloy in it. Gold rises and falls in China, according to the Demand for it. Gold bought at Touch for Touch, is when Ten Tale-weight of Sycee Silver is paid for One Tale-weight of pure Gold. Therefore Nine Tale-weights of Silver are to be paid for One of that mixed Mass, for ten times $\frac{9}{10}$ is 90, the Sycee Gold there is in, when at 90 Touch. If it touch 96, then are $\frac{96}{100}$ of Silver to be paid for one of Gold. If it touch 88, then $\frac{88}{100}$ of Silver for One Tale of Gold, so that if you separate the last Figure of the Touch for a Decimal, and then multiply this Number by the Weight of the Mass, you will have the Weight of Silver to be paid for it.

When Gold is sold above or under Touch, so much must you add to, or subtract from the Touch, and then proceed with the Touch so increased or diminished, as by the above Directions.

As if it touch 96, and is to be sold at 4 under Touch, then from 96 subtract 4, and the Remainder is 92, then is $\frac{92}{100}$ of Silver to be paid for One of that Gold.

If it is 96 Touch, and to be sold at 8 above Touch, then add 8 to 96, which is 104, then are $\frac{104}{100}$ of Silver to be paid for One of Gold.

Gold is bought by Ten Tale-weight, for upon that Quantity they make their Price in Silver.

If the Price is Touch for Touch, that is, Ten Tale-weight of pure Gold for 100 Tale of Current Silver, or 94 Touch. What you pay more or less, is called so much above or under Touch.

EXAMPLE. Suppose I buy 10 Shoes of Gold, Weight 95 Tale 5 Mace, Sycee (or 100 Touch) at Touch for Touch.

Tale	Tale	Tale Mace
If 10 of Gold cost	100 of Silver,	what will 95 5 cost?
10	10	10

100 Mace.

1000 Mace.

955 Mace.

1000

1000 955.000

1.0 955 Tale.

EXAMPLE. Suppose I buy 10 Shoes of Gold, weighing 95 Tale 5 Mace, at 105 Tale of Silver for 10 Tale of Gold.

If 10	195	95 5
10	10	10
100	1050	955
		1050

47750

9550

100 1002.7.50

10 1002.7.5

Answer, 1002 Tale, 7 Mace, 5 Candareen.

MONEY.

IN China they have no Coin of any Sort but Cash, which are small Pieces of some base Metal, about the Size of a Shilling, with a Hole in the Middle to put a String through, I suppose for the Convenience of carrying them about, they are used only by the poor People for Change in buying small Necessaries,

10 when of	make	1 Candareen,	equal to Sterling
10 Candareen,	make	1 Mace,	0 0 3
10 Mace	make	1 Tale,	0 0 8
3 Tale	make	1 Catty,	0 6 8
16 Tale-weight	make	1 Catty, or 21 oz. 3 $\frac{1}{2}$ drams	1 0 0
100 Catty	make	1 Picul, or 133 $\frac{1}{2}$ lb.	

In CHINA all Sorts of Provisions, as Milk, Fowls, Hogs, Greens, &c. are sold by the Catty, Their Gross Weights differ more or less, about one per Cent, they having no regular Standard kept; but the usual Refort for the Trial of their Dodegins are the Joss Houses, where they always keep what they call the true Dodging, but you will seldom find two of them agree.

Their Covis measure about 14 Inches and 15 Parts.

K K CHINESE

CHINESE CHARACTERS,

Whereby you may form some Judgment on the Value of their Gold.

The Face or Upper Part of a Bar of Gold.

Hoe Sze Yean Jang

This is the Stamp of the Paper that the Gold is put up in.

No. 1.

Note, This Gold is called by the Chinese, Twanghan, and is good 94 $\frac{1}{2}$ Touch, but they generally sell it for 95.

The Bottom or Back of the Bar, and if good is very rough.

No. 1.

This Gold is made at a Place called Coe, See, near Peking.

No. 2.

This Gold is called Seong Kutt, or Soang Catt, and is very smooth generally; but when true is very rough, and has a large bumpy Branch at the Bottom, then you may depend on it 92 Touch, otherwise it is not above 90 or 91.

Back

Seong

This Gold is called Seong Pou, or Soang Poa, and is good 93 $\frac{1}{2}$ Touch.

No. 7.

Face

Pou

The Back or Bottom is pretty smooth.

The Face has little rough Knobs in the Middle.

No. 3.

Tungzee. This is reckoned in Shoes, 96 Touch.

No. 8.

This is called Seon-yeukxze, Seong-Yeux, being a double Chop, and is good 94 and sometimes 95 Touch.

It is made at Coe Sue, near Peking.

No. 4.

Tungzee Yeunzee, or Tingwan, 95 Touch.

No. 9.

Pouzee

Pouzee

or Seong Po, being a double Chop, and is about 94 Touch.

No. 5.

This Gold is called Toozee, or Toujee, and is good 92 Touch, and when good has a little Rifing at the Bottom, like a Twig with two Branches.

Face

No. 6.

This Gold is called Cheuzee, or Swajzee, and is good 92 Touch, and sometimes better. When this Gold is good it has a large Bump at the Bottom.

No. 10.

Chuze

This Gold is in Bars, is commonly called Chuja, and is good 94 Touch.

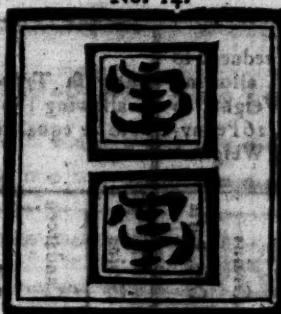

No. 11.

Chanzee

Or Swarhzy, is esteemed the best Shoe, and has a Lump at the Bottom, being 93 Touch, or sometimes more.

No. 14.

Ponsee

Ponsee

Or Seong Po, in Bars, is but little better than 93 Touch.

No. 12.

Onges

This is accounted at 93 Touch, but I believe it is not above 90.

Face No. 15. Back

This Shoe of Gold is called Cutzee, or Songcatt, being the Chinese Word for double, or a Pair, and Cutzee the Name of Gold, which joined are vulgarly called Songcatt. Never more than 90 Touch.

No. 13.

Toozee

This Gold is generally something better than 92 Touch.

No. 16.

Yeuksnee, Is always between 95 and 96 Touch.

No. 17.

The double Ring is the Chop on the Paper that contains the Shoe of Gold.

TABLES for turning or reducing CANTON Weight or Money to ENGLISH Troy Weight, and the same reversed.

TRADE

TRADE at MADAGASCAR in St. AUGUSTINE's BAY.

ON your Arrival, before you are permitted to trade, you are to send to the King of Babaw, a Present of

1 Ships Musquet
1 Cag of Powder
100 Gunflints
50 Musquet Balls
1 Gallon of Brandy

In return he sends you a Present of a large Ox for the Ships Company, viz.

20 Strings of small white Beads for	—	2 Measures of Rice each 7 Quarters
20 Ditto — blue or	}	For each — 2 ditto
15 Ditto — yellow or		
100 Single Pipe Beads —		
20 Strings of white, or	}	For each — 3 of Paddy
20 Ditto — yellow —		
20 Musquet Balls —	For	2 of Rice
20 Flints —		2 -- Ditto
20 Flints, or —	}	For — 3 of Paddy
20 Balls —		
20 Gun Flints, or —		
20 Ball —		For 5 Measures of Salt each 7 quarts
1 Quart Bottle of Gunpowder —		For 6 Measures of Salt
1 Ditto for each Sort of —	}	— 3 of Rice
		— 5 Callivances
		— 6 Bonavits
		— 6 Indian Corn
1 Clasp Knife —		3 full grown Fowls

Potatoes, Yams, Plaintins, Lemons, Milk, &c. for small Pieces of Linen Rags, Old Shirts, &c.
Prices of live Cattle of about 5 and 6 hundred W. exceeding fine Meat, was per Head

400 Musquet Balls, or
400 Gunflints, or
1 Ships Musquet, or
5 Spanish Dollars, or
8 Quart Bottles of Gunpowder, or
400 Strings of small Beads.

For any of the above Goods you may take your Choice out of large Drovers.—And sometimes every Thing is extraordinary cheap, an Ox has been had for 6 Bottles of Powder, and rather than carry the Cattle back again for three.

Some have bought a Cow and Calf for 10 Clasp-knives; and 5 Gallon Cag of Gunpowder, or 2 Musquets, purchased a Man Slave.

DRUGS and how to choose them.

GUM AMONIAUM. You must chuse the finest dry and white round Drops, of a Bitter unpleasant Taste; if lumpy, as full of Tears and clear as possible.

ASSAFŒTIDA. Chuse that which is dry and full of white, or yellow Drops, which when cut is in white Streaks and quickly turns of a red Colour, rejecting that which is moist and salt,

From PERSIA.

BENJAMIN. Take that which is clear and as transparent as possible, of a reddish Colour mixt with white Spots, of a good Smell free from Dirt and Drofs.

From MALLCCAA.

MYRRH. Take the finest white Tears inclining to a gold Colour, which being chewed, makes the Spittle white as Milk, of a bitter unpleasant Taste, free from Dirt and Leaves.

Bought at MOCHA and PERSIA.

OPPOPONAX. Chuse the fine dry Drops of a gold and reddish Colour without, and white within; of a strong Scent and bitter Taste, and avoiding that which is moist and black.

Bought at MOCHA and MUSCATT.

GALBANUM. Chuse that which is dry, with gold coloured Drops, breaking yellowish within, salt and glutinous, of a bitter Taste and strong Smell. As free from Dirt and Sicks as possible.

Bought at PERSIA

DRAGONS BLOOD Chuse the clear transparent and very brittle which being rubbed on white Paper, leaves a very beautiful red Colour, rejecting that which breaks of a Brick dust Colour.

Bought at SOCCATA.

GAM-

GAMBOUGE. Chuse the Rolls or Cakes that are clean and free from Dirt, or Sand, breaking of a yellow and inclining to an orange Colour,

Bought at MALLACCA.

BIRDS NESTS are made by a small Bird like a Swallow, in the Holes of Rocks, on unfrequented Islands, the Stuff it is made of, is a Slime they evacuate out of their Maw. Some says it is a Slime they get from the Surface of the Sea, others, that it is produced from a small Fish they eat, and others from a Sea Weed, none agreeing in their Opinions. It is divided into three Sorts, Head, Belly and Foot.

The Foot, is yellow, dirty, and has many Feathers in it. Being that which sticks to the Rocks, the Belly is yellow but clear of Dirt, the Head is white and very transparent, and is worth as much again as the Foot.

In buying it, Care must be had that it be dry, if so crisp as to break the better, because it then weighs light, but they generally damp it to make it heavy, and then it is tough, and plyable; the Foot and Belly, may with Pains be made Head, by picking the Feathers and washing the Dirt out, and then laid in the Dew, on Moonshining Nights, and it will by Degrees whiten like Cloth, but if the Sun comes to it, then it grows yellower and spoils.

MALLACCA.

BENJAMIN is generally in Cakes, which if good, is full of clear, Blood-colour and large white Spots, looking like Fat; but if droffy or foul, will be of a darker Colour not so clear, but more open, in Holes, and of a coarse Grain.

BORAX. Chuse that which is white and clear from Dirt or Nastiness.

BEZOAR Stone groweth in the Maw of Goats, Sheep, Hogs, Monkeys, Porcupines, &c. it is very sleek and smooth without, and of a very dark green Colour, the bigger and heavier the better, and of more Virtue; it is said it will kill a Spider if laid to it.

CHAMPHIRE. The best is from Borneo, white and clear as Crystal, strong scented, will crumble between the Fingers, and being fired will scarcely be quenched. It is divided into three Sorts, Head, Belly and Foot. The Head is in large Lumps, the Belly small ones, mixt with that which is brown, and as small as Sand. The Foot is all the small Sort, and not worth a Quarter so much as the Head; the China Champhire is nothing near the Value of the former, but must be white and clear without Dirt, and is in large Lumps, but not near so strong as the other, a Pecul of this being not worth a Catty of the other, if Fire is set to a Lump and it burneth away, leaving no Dirt behind it, it is Good.

BORNEO.

COPPER is of three Sorts, and sold in China (Viz.) Japan Bar Copper looks of a bright red Colour without, and when broke appears in small glittering Points. Canton Copper, in Bars, looks darker on the outside, and when broke, appears in gross Points with white and brown, this Copper run into Sheets is best.

CANES are of several Sorts, as the Dragon's Blood, a small white Cane seldom above 28 or 30 Inches long, the longer, bigger, and more tapering the better, for they are generally very small and white, therefore if they are clouded the better.

Another Sort is Jambee, or our Common walking Canes, and on the contrary, the less they are, the rounder, best tapered and clouded the better, they must be 32 Inches from Joint to Joint, and heavy, not light and kixey.

Another Sort, is the Japan Canes, which must be chose by the equal Distance of the Joints from each other, and their Bigness, Roundness, Stiffness and well tapering.

MALLACCA.

CASSIA LIGNUM the Smallest is best, being much like Cinnamon Bark, in Thickness, Colour, Scent and Taste, only rather sweeter in the Mouth, not so spirituous, and the Substance more sticky when chewed; the other sort is more gross and serves to distil, &c. there is also a Bark tasted like Cloves, of a brown Colour, and thick Substance, which is also used in distilling and will produce a pretty good Quantity of Oil or Spirits, but some of both Sorts are without Smell or Taste.

ANJANGOE.

CAUTCH is a red Gum, of a good Taste and is generally eaten with Beetlenut.

CHERANG is a liquid Lack they make at Cambodia, used for the lackering of Cabinets, &c.

CENA is to be bought at Mocha.

CLOVES is the Produce of several of the Spice Islands, and are often by the Dutch distilled near half their Substance off, and then dried and sold among other, but then they look shrivelled, generally loose the Knob that is on their Heads, and are light, and if very much distilled will not bear hard rubbing on a Board without powdering, and their Taste is neither so strong or pleasing, and are dry, to mend which and to make them weigh the better, they often wet them with salt Water which makes them swell and grow rotten, but the Taste will decide that.

COFFEE

COFFEE is the Produce of Arabia, and when fresh, the Berries look of a very pale green yellowish white Colour, and as they grow old and stale, grow browner and black: it grows round about the twigs of the Tree (or Shrub) in Single Berries, very thick in Clusters, with a short Stalk, not unlike our Ivy Berries, Laurel Berries, or rather the Mersian Flower, the Leaf is long like a Laurel Leaf, but not so smooth, or of that thick Substance.

CAMBOGIUM is the Gum or Sap of a tree produced in Cambodia and is called by the Natives Rong; when they take it, it is liquid and soft, and by Degrees hardens in the Sun; when they make it up into Lumps, its Colour is a dull orange Colour, but if wet and rubed on your Nail, gives a curious bright Lemmon-colour, by the Brightness of which and its appearing smooth and clean from Dross, it is known to be Good.

CHINA ROOT, when new and good, snaps short and looks glittering within, seeming to have a red Speck in it, and is heavy, but if old, dust flies out of it when broke, and is light and kicksey. If the Worm be in it is of no Value.

DIAMONDS are plentiful at Fort St. George, and there is some good ones at the Island Borneo, especially at Scaldavia; in the Choice of them observe that they be white, clear and smooth, free from Holes or Flaws and spread well, the coarsest sort is called Diamond Court, which is commonly bruised and used in assaying, &c.

The chief Things to be observed in buying rough Diamonds are,

- I. The Colour in 7 parts.
- II. Cleanness
- III. Shape.

I. The Colour, should be perfectly Chrysaline and resembling a Drop of clear Spring Water, in the middle of which you will perceive a strong Light playing with a great deal of Spirit, if the coat be smooth and bright with a little Tincture of green in it, it is not the worse, and seldom proves bad, but if there be a Mixture of yellow, with green, then beware of it, it is a soft greasy Stone and will prove bad.

If a Stone has a rough Coat that you can hardly see through it, and the Coat be white and look as if it was rough by Art, and clear of Flaws or Veins, and no Blemish cast in the Body of the Stone, which may be discovered by holding it against the Light, the Stone will prove good.

III. It often happens that a Stone shall appear of a reddish hue on the outward Coat, not unlike the Colour of rusty Iron, yet by looking through it against the Light, you may observe the Heart of the Stone to be white, and if there be any black Spots, or Flaws, or Feather, or double Earing, commonly called halfmoon Holes, or Veins in it, which by a true Eye may be discovered, although the Coat of the Stone be opaque, such Stones are generally good and clear.

IV. If a Diamond appears of a greenish bright Coat resembling a Piece of green Glass, inclining to black, it generally proves hard, and seldom bad, such stones have been known to have been of the first Water, and seldom worse than the second, but if any Tincture of yellow seems to be mixed with it, you may depend on its being a very bad Stone, and will not produce prime Cost.

V. All Stones of a milky Coat, whether the coat be bright or dull, if never so little inclining to the bluish Cast, are naturally soft, and in Danger of being flawed in the cutting, and though they should have the good Fortune to escape, yet they will prove dead and Milky, and turn to no Account.

VI. All Diamonds of a Cinnamon Colour Coat, are very dubious, but if of a bright, mixt with a little green, then they are certainly bad, and are accounted amongst the worst of Colours.

VII. You will meet with a great many Diamonds of a rough Cinnamon coloured Coat opaque, this Sort is generally very hard, and when cut, contains a great deal of Life and Spirit, but the Colour very uncertain, it is sometimes white, and sometimes brown, and sometimes a very fine Yellow.

I. Concerning the Fouls, and other Imperfections that take from the value of the Diamond, we must observe, all diaphenous Stones to be originally Fluids, and spirituous Distillations falling into proper Cells of the Earth, where they lie until they are ripened, and receive the Hardness we generally find them of, every Drop of which forms an intire Stone contained in its proper Bed, without Coats, while this petrefick Juice, or the Matter which grows in the Stone, in its original tender Nature, is liable to all the Accidents we find in it, and is so often incommoded with; for some little Particle of Sand or Earth falling into the tender Matter, is locked up in it, and becomes a black foul Spot, and as this is bigger or less, so it diminishes from the value of the Stone.

II. Flaws are some Accident, Shake, or Violence given to the Stone, whilst it is in the Bed, or in digging it out, and is an open Crack in the Stone, sometimes from the Outside to the Centre, and sometimes is in the Body of the Stone, but does not extend to the Outside, this is much the worst, and will require much Judgement to know how far it does extend, and takes half from the value.

III. Holes are framed on the Outside of the rough Diamond, and must be occasioned by some hard Particle of Sand falling into the tender Substance of the Stones, which not being heavy enough to sink into the Middle remains on the Outside thereof, like a black Spot, which being picked off, leaves a round Hole.

IV. The

IV. The next and greatest Care will be to avoid beamy Stones, and this requires more Skill and Practice than any Thing yet spoke off, it being a Difficulty to a great many Jewellers to discover; yet Time and Opportunity will enable you to discover them; indeed, a great many Stones are a little beamy in the Roundest, (by which I mean the Edges) but it is not so very material; though whatever it is, it diminishes from the Life of the Diamond. By beamy Stones I mean such as look fair to the Eye, and yet are so full of Veins to the Center, that no Art or Labour can polish them; they run through several Parts of the Stone, and sometimes through all; when they appear on the Outside they shew themselves like protuberant Excrecences, from whence run innumerable small Veins, obliquely crossing one another, and shooting into the Body of the Stone, the Stone itself will appear a very bright Coat and shining, and the Veins looking like a very small polished Steel, very rising upon the Surface of the Stone; this Sort of Stone will bear no Polishing, and is no better than a Piece of Bort, and is scarce worth a Rupee a Mangelin, sometimes the Knot of the Veins will be in the Centre, and Fibres shoot outward and the small Ends terminate in the Coat of the Diamond, this is more difficult to discover and must be examined by a nice Eye, yet you may be able here and there to perceive a small Protuberance like the Point of a Needle, lifting up the Part of the Coat of the Stone; though by a good Deal of Labour it should be polished, it will be a great Charge and scarcely pay for the Cutting; therefore to be esteemed little better than the former; yet, if you have not a great Deal of Care, the Indians will throw one of these Stones into a Parcel, and oftentimes the largest,

The next Thing to be observed is their Shape, which by a little Experience will quickly shew how to distinguish, which is as follows:

I. Stones in 4 Points. II. Stones in 2 Points. III. Stones in Flat. VI. and Laques.

First, Stones in Points consist in 4 equilateral Triangles at the Top, and the same at the Bottom, being a perfect Steragon. This is the most compleat Shape, and what Nature would produce in all Diamonds, were it not controuled by the Steel Corns of the Soil that forms the Bed in which the first tender Matter was cast; yet this is the Nature of the Stone, be what they will, this Shape makes the best Brilliants, and when sawed in four Points, the best Roses, and are esteemed more than others, whether shaped thus or rough.

Secondly, Stones in two Points are when four of the triangled Planes are broader than the other four: This will make a thinner Brilliant, and loofe more in Cutting, and will not retain so much Life. For Roses it must be sawed through the two Points, and will make fine Roses, but not lively as the former.

Thirdly, Stones in the Flat, is when the Points are so depressed and confined, that you only see the Traces where Nature would have polished them, had they not been confined; therefore they are irregular and distorted. In cutting these Stones they do not regard the Points, but make the flat Way either Roses or Brilliants, the Stones may be split in the Flats therefore so called; and when split rough in these Shapes, they loofe more in cutting than the other.

Fourthly, Laques, or La Crades, is the Term for all Diamonds cut or polished in India, which make their Colour and Defects more apparent, not forgetting that these Colours, which they then have, will be more conspicuous, when cut and polished over again in Europe.

A TABLE of the Prices of Rough Diamonds, if good.

N. B. One Mangalin is $5 \frac{1}{2}$ Carat Grains.

Stones of 2 Grains Weight each, are worth	l.	s.	per Carat.
3 ditto	2	5	per ditto.
4 ditto	2	10	per ditto.
5 ditto	3	0	per ditto.

40 ditto	25	0	per ditto.
	32	0	per ditto.

ALLOES SOCATRINA, clear from Dross, looking, when rubbed to Powder, of a Saffron Colour, or broken thin is transparent, then it is good, the Taste being very bitter. At MOCHA.

ALLOES HEPTICA is of a yellowish or bright Liver Colour when good, but if black, then it is bad.

AMBERGREESE, the best is whitish without, and grey within, sweet and smooth, when pricked with a Needle it sweats out Fatness, softens in the Heat, and when moist appears black, if it swims on the Water it is good, or the Point of a Knife being heated in the Fire, and a Piece laid on it, if it melts all away and smells well, it is good; but if a Coat or Drofs remains behind, it is adulterated; the false looks black, and sometimes whitish, but may be discovered by the Smell.

ASPHALTUM is hard and black as Pitch.

AMBER, I am informed, is to be had at Mofambique, Malinda and the Maldives, which I take to be a Mistake instead of Ambergreese. If Amber is good and strong, rub it on your Coat, and it will take up a Pin, Needle or Straw.

ANNISEEDS. If they are small like Wormseed, of a fresh Smell and sound, they are good.

CARDEMUMS. Chuse the freshest, well fed, weighty and best filled Husks, well dried and sound, as white and as large as you can. On the MALLABAR COAST.

CINNABAR NATIVE. Chuse that which is in small Grains, of a high red Colour, leaving a most beautiful red on white Paper.

COSTUS DULCIS. Take the fairest heavy Roots, of a gray Colour without, and reddish within, of a fine strong Smell and aromatic Taste.

CUBEBS. Chuse them as near Pepper as possible you can, and free from Stalks.

DRAGONS BLOOD in Drops, is in short Pieces, about the Bigness of a small Stick of Wax, is done up in Bits of Cajan Leaves, tied together on long Strings, it looks of a deep red, and when broke, the clearer, livelier red and fine green, the better. Dragons Blood in Lumps, is a much scarcer Sort, more of a deep brick Colour, and full of Knobs, the clearer the Colour and the smoother the Grain, the better.

EBBONY is produced in great Quantities at Cochin, China, and only Care is to be taken that it is found and without any white Wood upon it

ELIPHANTS TEETH, the larger the better, of 1, 2, 3, or 4 Pecul each. The less are not near the Value. The straight, white Teeth, without Flaws, and not very hollow in the Stump, but solid and thick, are the best.

Any Eliphants Teeth weighing above 16 Seer or 15 lb. Avoirdupoise, are sold in India by the Maund of 40 Seer, which is at Surat 37 $\frac{1}{2}$ lb.

And from 16 to 10 Seer, are sold by the Maund of 60 Seer, or Surat Maunds 1 $\frac{1}{2}$.

From 10 to 5 ditto ————— 80 ————— 2

And all under 5 ditto are sold by the Maund of 160 and is ditto ————— 4

For the 1st Sort or Size are sold for 144 Rupees per C.

2d Sort ————— 96 ditto

3d Sort ————— 72 ditto

4th Sort ————— 36 ditto

Mofambique Teeth are most esteemed at Surat and Cutch, and will generally sell for

The 1st Sort ————— 160 Rupees per Cwt.

2d Sort ————— 112 ditto

3d Sort ————— 84 ditto

4th Sort ————— 42 ditto

GALLINGALL. Chuse such Roots as are well fed, of a reddish Colour and biting aromatic Taste, rejecting the large Sort. At CHINA.

JENTIAN is very much eaten by the Chinese, as a great Cordial and Strengtheners, it is a Root which grows with them, but is very dear and not much used in England.

INDICO is a Weed or small Shrub, which they pull and sling into a Pit of Water, prepared for that Purpose, and there it lies and rots, often disturbing and stirring the Water, and when it is quite rotten and the Water thickened with it, they let it settle to the Bottom, and then draw off the Water; when the Settlement is dry and hard, they cut it in square Pieces, and it separates clean from the Ground. The clearer from Sand the better, and when burnt in a Candle, if it falls out like Meal, it is good, but if sandy, bad. If good, it will swim when you throw it into Water.

LIGNUM ALLOES. The Tree is like an Olive; when it is first cut, it smelleth not so well, but for the Dyer it is the better, though the strongest Smell is most esteemed. Put a small Piece into a Candle or a clear Fire, if it fries well, and the Smoke hath a strong pleasant Smell, then is it good. The whole Tree does not produce that which smells and which is full of Gums, only in Knots and Veins, so that it is commonly in Pieces of an Ounce Weight, and seems to be rotten, but such as cuts in black and brown Veins, and is heavy, is the best. There is another Sort of Wood will fry so, but is easily distinguished by the Smell.

MACE grows about the Nutmeg, and the Dutch sometimes extract some of the Spirits from it, and then mix it with other, but that is easily distinguished by the Dryness of it. The brighter Colour it is of, the better.

MUSK. The Musk Cat, I am told, is a Creature like a small Fox or little Dog, which, being killed, they let him lie and rot, Blood and Flesh together, which becoming a Sort of fat Mould, they make round Balls of it, about an Ounce Weight, and sow it up in Skins; but the right and purest is the Cods of the Beast, the other not being near so good, though by the Chinese sometimes put up in Cods, and is often falsified by them with Ox or Cows Liver beaten to Powder and mixt with the Musk, and when it begins to decay and loose its Smell, they take it out of the Skin and beat it well in a Morter, then they moisten it with the Urine of a Child, and put it into an earthen Pot that is close leaded and stopp'd, and it will be soon strong again, if there is any Virtue left in it, and then they fit it for Sale again. To choose it in the Cods, they must be large and thin, and narrowly search'd into, that it has not been opened and repack'd; it must be of a bright Liver Colour, in small Vein Grains, in Taste keen upon the Palate, and smell fresh and strong.

NUX VOMICA is produced plentifully in China (Cohin) and is the Kernel of a Fruit, about the Bigness of a small Pippin, each having six Kernels. When it is glossy and well dried it is good.

OPIUM is produced in Bengal, about Patna, being made of Poppy Leaves. When new, it is soft and of a strong Smell; when old, the Lumps dry into a Crust on the Out-side, and not unlike dry Cow Dung, only of a blacker Cast, and so by Degrees comes to be quite hard, and then is good for nothing.

OIL of CINNAMON is very strong of Spirits when good, and touching your Lips or Tongue with it, will make them burn like Fire. The Way to try whether it is mixed is to drop it into a Glass of Spirit of Brandy, and if good it will sink in a Lump to the Bottom, but if adulterated, Part of it will only sink, and it will leave an Oil on the Top of the Brandy; but Water and Sugar, mixed together, is the strongest Proof, if it holds together; and both this Way and the other, one Drop in a Glass will make the Glass above the Liquor turn blue, which is a good Sign.

OIL of CLOVES, Cortex Arromatick, Camphor ex rad. Cipamo, &c. Oils, are to be tried the same Way as above, but are not near so strong of Spirit.

PEPPER, BLACK, when gathered in due Season, is round and full, but if not, it is shrivell'd, and if it is old, by rubbing it in your Hand, or on a Board, will break and powder.

PEPPER, WHITE, is made of the fullest and best black, by blanching it, which is a great Deal of Trouble and Loss.

PEACOCKS TAILS and KINGFISHERS SKINS are much used among the Chinese, to make their raised Featherwork of Birds, and the latter is sometimes used amongst the Women to dress their Hair with the finest of the Feathers; therefore Care must be taken that they are not tumbled or spoiled.

PEARLS. Many are taken out of Oysters at Tutocorin, which they open and fling into a great Jar together, until they are rotten, and then feel for the Pearls. They are valuable according to their Bigness, Roundness or Equalness of Size in a Quantity, and must have a clear bluish Cast with them, and not a dull yellowish.

RHINOCEROS HORNS is a great Expeller of Poison, and is short and black, growing just in the Middle of the Beast's Forehead, and if found are good.

RATTANS are of several Sorts and Value, Borneo Rattans are large and light, not above 12 Feet long, and are the worst Sort. Mallay Rattans are longer, sounder, and have a better Case and Glazing, but Patna Rattans are the best, especially for any thing of Canework, they have a very fine Glaze and are 16 Feet long, not brittle nor subject to break, and are tied up very neatly at the Bend of the Bundle, so that none can be taken out, they are bought by the hundred Bundles, each containing 100, but in China are sold by the Pecul, about 7 Bundles of these last is a Pecul, 9 of the Mallay, and 12 of the Borneo, which two last Sorts are as good for the Chinese. If they snap short, look black, or the Glazing fly off with the Bending, they are not good.

RED WOOD, or Pan Sapan, is of several Sorts, Cambodia is the best, and Beeme the next, and the Java and Mallay the worst of all; there is no Art in choosing it, only take Care that it be sound, the outward Wood or Bark cut clean off, a good Red, and rubbed with wet Chenam is of a Pink Colour.

SAGGAPENUM must be in fine Tears, clear and very transparent, of a strong Smell and yellow or red Colour, and free from any Dirt or Filth.

SAGOE is the Pith of a Tree, as I am informed, and is made into small round Grains like Seeds, which the whiter the better.

SHERK FINS are much used by the Chinese in their Victuals, and counted very hearty and strengthening, in buying them Care must be taken that they are well cured.

SANDALL WOOD is of two Sorts, yellow and red, and comes chiefly from the Island Timor, and some from the Coast of Mallabar, the red is of no great Value, but the yellow is esteemed by the Bigness of the Sticks, Goodness of the Scent and Colour, Clearness from Worms and rotten, and the white outside Wood must be cut clean off; when cut it must look of a yellow Colour, the deeper and stronger

stronger, the better, and the Scent will be accordingly; they often mix a great Deal of Wood of the same Tree, which on the Out-side looks as well as the best, but when cut hath neither Scent nor Colour, and is not worth any thing; the yellow is valuable in China from Twelve to Eighty Tale, a Pecul, according as it proves scarce or good.

RAW SILK is to be chosen by the Fineness of it, pure, white, glossy and dry. The Chinese mix their Bundles with a great Deal of ordinary in the Middle of the Skaines, so that great Care must be taken in the opening and examining it, and Respect must be had to the double Bands they tie the Bundles up with, also to the Dryness of the Silk, which will differ near 20 per Cent. if Care be not taken.

SILKS, WROUGHT. It would be a long Piece of Business to speak of every Sort of Silk, and beyond my Experience; therefore of the China Silks in general, Care must be taken, that they be received dry, or else they will mildew and spoil, especially, Pelonga, Geelonga, &c. which they weigh, and deliver them often very wet to make them heavy; therefore we dry them over a quick Charcoal Fire. The Fineness and Price of them is generally agreed on by Muster, but Care must be taken that the Hannoes, &c. have not too much Gum or Congee in them, which makes them weigh heavy and the Silk lie close, whereby the Fineness of it is not so well seen, and it always mildews them. A fine limber Silk, clear of Knots, Knobs and uneven Threads, on the back Side fine and glossy, as well as the right Side, is the best Silk.

SEA WEED grows on the Rocks, and being salted is much esteemed and eaten by the Chinese.

SEA SLUGS are Sea Animals, like our long Slugs in England, but much larger, which they put up in Salt after they are boiled, and will keep a long Time, and are by the Chinese always put into strong Broths, they being very nourishing.

TUTANAGUE is a Metal like Tin, but much better and softer. There is no Difficulty in buying it, only to see that it be clear of Drofs.

TIN is the Product of most of the Malley Countries, and is used in China, to mix with their Tutanague. For further Particulars read Page 112.

TINCAL or Borax from Bengal, about 3 l. per Cwt. The more glassy, clear Pieces, the better, yet if you find it in Duppers, and it is greasy, provided it is pretty free from Earth and Drofs (of which there is always some in it) you may bring it.

TOBACCO of Manilla is in Leaves, and is chosen by the Brightness of it. There are two Sorts, the great and small Leaf, the largest will yield more than the small by 10 or 15 per Cent.

VERMILLION, the Lump and Powder. The Lump or Mineral itself is of a dark red Colour, and you must take Care it be not dirty or droffy. The Powder, when prepared, is the finest red; at Mocha the Lump will yield double Profit of the Powder, which you must sell at half Price, so Care must be taken not to have it thrown down and broke.

WAX, is divided into three Sorts and Prices, Head, Belly and Foot; the last is of an Ash Colour and soft, which, though clear of Drofs, is of little Value; the Belly is yellower and harder, but droffy, in Veins; the Head is a clear yellow or white, free from Drofs or any Veins of the Belly or Foot, to discover which, if the Cakes are large you must cut them in the Middle, and the different Sortments will soon be seen.

MEMORANDUM for DRUGS.

Names.	Where to be bought.	King's Duty			Per Cwt. or lb.	Company's Duty.	Price Current in London.	
		l.	s.	d.			l. s.	l. s.

N. B. The fractional parts of two Tenths of a Penny, that arise every Day in the Circulation of the Wages, in the 3d, 5th, and 7th Columns, are rejected in the several Additions in compiling those Columns, when under six Tenths of a penny; but from six Tenths to eight Tenths of a Penny, inclusive, they are reckoned as one Penny.

These are of English Canvass.		A CORD.	
R r			

A CORDAGE TABLE.

Shewing how many Fathoms, Feet and Inches of a Rope of any Size under 14 Inches, makes a Hundred Weight. With the Use of the Table.

[illegible]

The Top of the Table, marked Inches, Fathoms, Feet, Inches, the first Column being the Thickness of the Rope in Inches and Quarters, and the other three the Fathoms, Feet and Inches that make up an Hundred Weight of such a Rope. One Example will make it plain.

Suppose I desire to know how much of 7 Inch Rope will make a Hundred Weight? Find 7 in the third Column under Inches or Thickness of the Rope, and against it in the fourth Column you will find 9 5 6, which shews that in a Rope of seven Inches there will be 9 Fathom, 5 Feet, 6 Inches required to make one Hundred Weight.

A TABLE, shewing the WEIGHT of any CABLE or ROPE of 120 Fathoms in Length, and for every half Inch, from 3 Inches to 24, in Circumference.

I chuse to instance in a Cable of the Length above mentioned, because your Set at 200 Fathoms will in Laying of a Cable work up or shorten to 120 Fathoms, Cable laid Ropes working in about two Parts in five, but if it be half a Cable or any other Length the Weight of 120 Fathom being found by the Table, the Weight of any lesser Part is to be easily found in Proportion to its Length.

The USE of the TABLE.

The first Column marked for Inches, is the Thickness or Circumference of the Cable to every half Inch from 3 to 24. The second, marked Cwts. Qrs. for Hundred Weights and Quarters that it will weigh, if 120 Fathoms in Length.

As for Instance: Suppose it to be a Cable of 14 Inches and a half. Look against $14\frac{1}{2}$, and you will find in the other Column 52 Cwt 2 Qrs which shews that 120 Fathoms of $14\frac{1}{2}$ inches Cable will weigh 52 Cwt, 2 Qrs. and so in others, and any Quantity of a lesser Length will weigh in Proportion.
